

TI-E - Practical Troubleshooting of Instrumentation, Electrical and Process Control Systems

Availability: In Stock

Price: \$139.94

Ex Tax: \$127.22

Short Description

This manual uses a systems approach to troubleshooting and is designed to encourage readers to take a new look at the methodology of fault finding and rectification on their plant. Having covered the types of equipment, the manual then looks at first line troubleshooting, then the advanced level and finally works through some typical examples.
