

Contents

1	Basics of Mechanical Design	1
1.1	Introduction	1
1.2	Basic Concepts	3
1.3	Units of engineering quantities	5
1.4	Friction	6
1.5	Summary	9
2	Mechanical Drawings	11
	Section A – Types of lines and letter used in drawings	11
2.1	Types of lines	11
2.2	Lettering of drawings	14
2.3	Summary of Section A	14
	Section B – Projections	14
2.4	What is projection?	15
2.5	Pictorial projections	17
2.6	Concept of cutting plane and sectional view	18
2.7	Summary of Section B	22
	Section C – Dimensioning	23
2.8	Different systems of dimensioning	23
2.9	Dimensioning practices	23
2.10	Summary of Section C	24
	Section D – Assembly Drawings	24
2.11	Summary of Section D	26
	Section E – Welded Joints	26
2.12	Types of welded joints	26
2.13	Summary of Section E	28
	Section F – Bolt, nut and screw fasteners	28
2.14	Introduction	28
2.15	Summary of Section F	30
	Section G – Keys, keyways and keyed assemblies	30
2.16	Types of keys	32
2.17	Summary of Section G	33
	Section H – Tolerance, limits and fits	33
2.18	Concept of tolerance	33
2.19	Concept of limits	34
2.20	Concept of fit	35
2.21	Summary of Section H	36
	Section I – The role of CAD and CAM	37
2.22	Use of computers for preparation of drawings	37
2.23	CAD software	37
2.24	Computer Aided Manufacturing (CAM)	38
2.25	Summary of Section I	38
	Section J – Office Practice	38
2.26	Drawing number and part name	38
2.27	Summary of Section J	39

3	Engineering Materials	41
3.1	Mechanical properties of materials	41
3.2	Processing of metals and alloys	43
3.3	Stress and strain in metals	46
3.4	Normal stress and shear stress	48
3.5	Tensile and hardness testing	48
3.6	Stress and strain diagram	52
3.7	Alloy production and properties	55
3.8	Fracture of metals	60
3.9	Corrosion types and control	64
3.10	Summary	66
4	Mechanical Design	67
4.1	Introduction	67
4.2	Codes and standards	70
4.3	Design considerations	70
4.4	Factor of safety	76
4.5	Mechanical components	77
4.6	Fasteners/screwed joints	105
4.7	Fastener failure	112
4.8	Compression members	116
4.9	Summary	121
5	Keys, Keyways and Splines	123
5.1	Keys and keyways	123
5.2	Keyways	126
5.3	Setscrews and pins for torque transmission	127
5.4	Splines	128
5.5	Spline failures	133
6	Bearings	135
6.1	Introduction	135
6.2	Plain or sliding contact bearings	135
6.3	Operation of sleeve bearings	136
6.4	Rolling contact or anti-friction bearings	138
6.5	Ball bearing	139
6.6	Roller bearing	144
6.7	Other bearing types	147
6.8	Bearing selection considerations	148
6.9	Bearing loads	149
6.10	General installation considerations	151
6.11	Bearing materials	151
6.12	Bearing lubrication	154
6.13	Bearing life	156
6.14	Bearing clearance and preloading	157
6.15	Bearing failures	159

7	Gears and Gear Drives	179
7.1	Introduction	179
7.2	Gear geometry	179
7.3	Spur gears	181
7.4	Helical gears	185
7.5	Bevel gears	188
7.6	Worm gears	191
7.7	Gear trains	192
7.8	Gear load carrying capacity	196
7.9	Selection of gear drives	197
7.10	Service factor	199
7.11	Gear installation	204
7.12	Backlash and adjustment	205
7.13	Gear lubrication	218
7.14	Gear materials	220
7.15	Gear failures causes and remedies	223
8	Variable Speed Drives	237
8.1	Introduction	237
8.2	Variable speed belt drives	239
8.3	Mechanical couplings	240
8.4	Copp variator	240
8.5	Hydrostatic drives	242
8.6	Gearboxes	243
8.7	Constant mesh gearbox	243
8.8	Sliding mesh type	244
8.9	Synchromesh gearbox arrangement	245
9	Belt Drives	249
9.1	Flat belts	249
9.2	V-belts	253
9.3	Timer or toothed belts	258
9.4	Belt selection	261
9.5	Installation of flat belts	264
9.6	Installation of V-belts	272
9.7	Belt materials	276
9.8	Belt service factors	277
10	Chain Drives	285
10.1	Introduction	285
10.2	Selection of chain and sprocket	289
10.3	Silent chains	294
10.4	Chain lubrication	297
10.5	Installation and maintenance	299
10.6	Drive selection	304
10.7	Service factoring for chain drives	304

11	Couplings	307
11.1	Introduction	307
11.2	Rigid couplings	307
11.3	Flexible couplings	309
11.4	Service factoring and coupling load characteristics	312
11.5	Universal joints	314
12	Clutches	319
12.1	Introduction	319
12.2	Clutch classification	320
12.3	Positive mechanical clutches	322
12.4	Mechanical friction clutches	325
12.5	Electro-magnetic clutches	331
12.6	Hydraulic couplings and torque converters	335
13	Brakes	337
13.1	Introduction	337
13.2	Mechanical brakes	342
13.3	Electromagnetic brakes	345
13.4	Pneumatic brakes	347
13.5	Hydraulic brakes	350
13.6	Brake selection and performance	353
14	Prime Movers	355
14.1	Introduction	355
14.2	Internal combustion engines	358
14.3	Hydraulic motors	358
14.4	Air motors	359
14.5	Steam turbines	359
14.6	Electric motors	360
14.7	DC motors	362
14.8	AC motors	363
14.9	AC poly-phase motors	365
14.10	3-phase squirrel-cage induction motors	366
14.11	AC synchronous motors	368
15	Fluid Engineering	371
15.1	Pumps	371
15.2	Compressors	382
15.3	Turbines	386
15.4	Flow in pipes	392
15.5	Thermodynamics	398
15.6	Reversibility	405
15.7	Summary	405

16	Theory of Heat Transfer	407
16.1	Heat basics	407
16.2	Heat transfer	409
16.3	Laws of thermodynamics	411
16.4	Thermal cycles	413
16.5	Heat exchangers	420
16.6	Heat pumps	423
16.7	Air conditioning	425
16.8	Summary	426
17	Mechanical Vibrations	427
17.1	Introduction	428
17.2	Terminology: Frequency, Amplitude and Phase	433
17.3	Natural and forcing frequencies	447
17.4	Vibration measurement: Sensors, analyzers and Interpretation	450
18	Manufacturing	485
18.1	Foundry process	485
18.2	Heat treatment	488
18.3	Hot working of metals	489
18.4	Cold working of metals	491
18.5	Pressing	493
18.6	Numerical control	496
18.7	Sawing	500
18.8	Broaching	500
18.9	Shapers and shaping	501
18.10	Welding	501
18.11	Brazing	502
18.12	Computer aided manufacturing (CAM)	503
18.13	Manufacturing processes in oil and gas industry	504
18.14	Summary	504
19	Maintenance	505
19.1	Introduction	506
19.2	Maintenance philosophies	508
19.3	Tighten, lubricate, clean (TLC)	510
19.4	Condition monitoring methods and failure analysis	513
19.5	Scheduling maintenance	541
20	Mechanical Engineering Codes and Standards	545
20.1	Need for standardization	545
20.2	Overview of standards	546
20.3	Benefits of standardization	547
20.4	Mechanical engineering standards	548
20.5	ISO 9000/1	548
20.6	Six Sigma	550
20.7	Summary	551

Appendix A	Practical Exercises	553
Appendix B	Answers to Practical Exercises	597
