

Contents

1	kWh and kVArh meters	1
1.1	kWh meters	1
1.2	After Diversity Maximum Demand (ADMD)	3
1.3	Principle of operation of various kWh meters	4
1.4	kVArh meters	10
1.5	Various connections of kWh and kVArh meters	13
1.6	Calculation of multiplier factor	14
1.7	Apparent, active and reactive power calculation	15
1.8	kWh and kVArh meters: Testing and calibration	18
1.9	Summary	25
2	Introduction to Smart Metering	27
2.1	Energy Measurement	27
2.2	Gas/Water/Heat metering	29
2.3	Conventional meters (electricity)	37
2.4	Metering approaches	41
2.5	Need for Smart Metering	44
2.6	Features of Smart Metering	47
2.7	Summary	50
3	Basics of Smart Meters	53
3.1	Definition of a Smart Meter	53
3.2	Functions and Features of Smart Meters	54
3.3	Block Diagram of Smart Meters	56
3.4	Introduction of Prepayment Meters	62
3.5	Tampering and Security of Meters	67
3.6	Introduction to M-bus(EN13757) and Wireless M-bus	70
3.7	Summary	73
4	Metering Technologies	75
4.1	Metering technologies for Smart Metering	76
4.2	Technologies Used for Communication	80
4.3	Technologies for Data Storage	85
4.4	Meter Data Management (MDM)	87
4.5	Methods Used for Billing (Tariff Structure)	92
4.6	Load Control Technology	98
4.7	System Architecture and Implementation	102
4.8	Summary	108
5	Advanced Metering Infrastructure (AMI)	111
5.1	Definition of AMI	111
5.2	Advanced Meter Reading Solutions (AMR)	115
5.3	Implementing AMI	119
5.4	Benefits of AMI	128
5.5	AMI Communication Strategy	131
5.6	Security Aspects for AMI	144
5.7	AMR vs AMI Capability	155
5.8	Summary	156

6	Smart Grid	157
6.1	Need for Smart Grid	157
6.2	Characteristics of Smart Grid	162
6.3	Future of Smart Grid	164
6.4	Features and Implementation of Smart Grid	167
6.5	Technologies for Smart Grid	171
6.6	Smart Grid Milestones	184
6.7	Summary	188
7	Applications of Smart Metering	189
7.1	Implementation of Smart Metering for Water Utilities	189
7.2	Implementation of Smart Metering for Gas Utilities	198
7.3	Study Reports of Smart Metering for Energy Savings	201
7.4	Designing of Smart Homes Using Smart Metering	205
7.5	Designing of Smart Premises Using Smart Metering	208
7.6	AMR Used in Sub Metering	217
7.7	Summary	220
8	Implementation of Smart Metering in Different Countries	221
8.1	Smart Metered Countries	221
8.2	Smart Metering Initiatives Around the World	222
8.3	Cost Benefit Analysis for AMI	229
8.4	Case Study and Roll Out of AMI Trials for Australia	236
8.5	Summary	246
Appendix A	Smart Meter Case Study	247
Appendix B	Glossary	255
Appendix C	Questions	259
Appendix C	Answers	267
