

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Overview of Instrumentation and control	1
1.2	Key building blocks of PLCs and SCADA systems	2
1.3	Outline of the course	3
<b>2</b>	<b>Introduction to Process Measurement</b>	<b>5</b>
2.1	Basic measurements and control concepts	5
2.2	Definition of terminology	9
2.5	Measuring instruments and control valves as part of the overall control system	11
<b>3</b>	<b>Pressure Measurement</b>	<b>13</b>
3.1	Principles of pressure measurement	13
3.2	Pressure transducers and elements	14
<b>4</b>	<b>Level Measurement</b>	<b>27</b>
4.1	Principles of level measurement	27
4.2	Simple sight glasses	28
4.3	Hydro pressure	29
4.4	Ultrasonic measurement	36
4.5	Electrical measurement	39
4.6	Density measurement	44
<b>5</b>	<b>Temperature Measurement</b>	<b>47</b>
5.1	Principles of temperature measurement	47
5.2	Thermocouples	48
5.3	Resistance Temperature Detectors (RTDs)	49
5.4	Thermistors	52
<b>6</b>	<b>Flow Measurement</b>	<b>53</b>
6.1	Principles of flow measurement	53
6.2	Open channel flow measurement	57
6.3	Oscillatory flow measurement	60
6.4	Magnetic flow meters	67
6.5	Positive displacement	68
6.6	Ultrasonic flow measurement	70
6.7	Mass flow meters	72

<b>7</b>	<b>Fundamentals of Process Loop Tuning</b>	<b>75</b>
7.1	Processes, Controllers and Tuning	75
7.2	Proportional-Integral-Derivative (PID) Controllers	84
7.3	Gain, Dead Time and Time Constants	86
7.4	Process Noise	88
7.5	General Purpose Closed Loop Tuning Method	88
<b>8</b>	<b>Introduction to Control Valves</b>	<b>91</b>
8.1	Introduction	91
8.2	Definition of a Control Valve	92
8.3	Cavitation	99
8.4	Flashing	100
<b>9</b>	<b>Different Types of Control Valves</b>	<b>101</b>
9.1	Introduction	101
9.2	Globe Valves	102
9.3	Butterfly Valves	105
9.4	Eccentric Disk or High Performance Butterfly Valves	106
9.5	Ball Valves	107
9.6	Rotary Plug Valves	110
9.7	Diaphragm Valves	110
9.8	Pinch Valves	111
<b>10</b>	<b>Fundamentals of PLCs</b>	<b>113</b>
10.1	Introduction to the PLC	113
10.2	Alternative Control Systems - where do PLCs fit in?	114
10.3	Why PLCs have become so widely accepted	114
<b>11</b>	<b>Fundamentals of PLC Hardware</b>	<b>119</b>
11.1	Block diagram of typical PLC	119
11.2	PLC processor module – memory organization	120
11.3	Input / Output section – module types	122
11.4	Power Supplies	127
<b>12</b>	<b>Fundamentals of PLC Software</b>	<b>131</b>
12.1	Methods of representing Logic	131
12.2	Ladder Logic Basics	134
12.3	The basic rules for programming	136
<b>13</b>	<b>Introduction to SCADA Systems</b>	<b>139</b>
13.1	Fundamentals	141
13.2	Comparison of SCADA, DCS, PLC and smart instruments	141
13.3	Typical SCADA installations	146
13.4	Definitions of terms	147

<b>14</b>	<b>SCADA Systems Hardware</b>	<b>149</b>
14.1	Remote Terminal Unit (RTU) structure	149
14.2	Analog and digital Input/Output modules	150
14.3	Master site structure	160
<b>15</b>	<b>SCADA System Software</b>	<b>165</b>
15.1	Fundamentals	165
15.2	Components of a SCADA system	166
15.3	Software – design of SCADA packages	168
15.4	Configuration of SCADA systems	173
15.5	Building the user interface	181
<b>16</b>	<b>Basics of Data Communications between PLC and SCADA Systems</b>	<b>189</b>
16.1	Twisted pair cables	189
16.2	Fiber optic cables	192
16.3	Public network provided services	194
16.4	Industrial Ethernet	194
16.5	TCP/IP	197
16.6	Fieldbus	199
16.7	Modbus	201
16.8	LAN Connectivity	208
16.9	SCADA network security	211
<b>17</b>	<b>Drawing Types and Standards</b>	<b>213</b>
17.1	Understanding diagram layouts and formats	213
17.2	Cross references	229
17.3	Piping & Instrumentation Diagrams (P&ID)	229
<b>Appendix A</b>	<b>Symbols and Numbering</b>	<b>238</b>
<b>Appendix B</b>	<b>Practical Exercises</b>	<b>257</b>
