

# Table of Contents

<b>Chapter 1— Fundamentals and principles</b>	<b>1</b>
1.1 Zero leakage	1
1.2 Mechanics of sealing	1
1.3 Leakage	2
1.4 Purpose of sealing	3
1.5 Speed and pressure	3
1.6 Temperature Considerations and $\Delta T$ Limit	4
1.7 Basic seal requirements	4
1.8 Seal friction	5
1.9 Wear and seal life	9
1.10 Texture	9
<b>Chapter 2— General and Special Seal Types</b>	<b>13</b>
2.1 Static and Dynamic Seals	13
2.2 Special Seal Types	17
2.3 Bushing seals	20
2.4 Labyrinth seals	22
2.5 Diaphragm seals	25
2.6 Gas seals	26
2.7 Slurry seals	26
2.8 Carbon seals	27
2.9 Liquid ring seals	29
2.10 Liquid barrier seals	30
2.11 Inflatable seals	32
2.12 Ferro fluidic seals	33
2.13 Positive action seals	35
2.14 Self adhesive compression seals	35
<b>Chapter 3— Materials of Seal Construction</b>	<b>37</b>
3.1 Properties of elastomers	37
3.2 Elastomeric materials	41
3.3 Plastic polymers	44
3.4 Cemented carbides	45
3.5 Miscellaneous sealing materials	47

<b>Chapter 4—Seals for specific/special conditions</b>	<b>51</b>
4.1 Hydraulic seals	51
4.2 Pneumatic seals	56
4.3 Seals for special applications	59
4.4 Large diameter seals	62
4.5 High speed sealing applications	63
4.6 High-speed sealing requirements	64
4.7 Sources of excessive hydraulic pressure	64
4.8 Steps to overcome problems associated with high-pressure applications	64
4.9 Vacuum sealing applications	65
<b>Chapter 5— Seal selection guides, application and standards</b>	<b>67</b>
5.1 Seal selection guides	67
5.2 Applications	73
5.3 Static seal applications	73
5.4 Dynamic seal applications	74
5.5 Standards	76
<b>Chapter 6—Introduction to mechanical seals</b>	<b>79</b>
6.1 Introduction and fundamentals	79
6.2 Sealing mechanism	79
6.3 Desirable features in a mechanical seal	80
<b>Chapter 7— Mechanical seal design and classification</b>	<b>81</b>
7.1 Identifying mechanical seal components and their function	81
7.2 Primary sealing components	83
7.3 Secondary sealing components	87
7.4 Seal types and arrangements modes	89
7.5 Sealing face conditions	98
7.6 Seal pre-loading	99
7.7 Seal balance and balance ratio	103
7.8 Pressure distribution	105
<b>Chapter 8— Mechanical seal materials</b>	<b>107</b>
8.1 Introduction	107
8.2 Desirable properties	107
8.3 General considerations concerning seal materials	108
8.4 Suitable mating combinations	108
<b>Chapter 9— Environmental considerations and control</b>	<b>111</b>
9.1 Environmental considerations and control	111
9.2 Environmental controls	112
9.3 API 610 and 682 environmental control schemes	117

<b>Chapter 10— Auxiliary equipment</b>	<b>129</b>
10.1 Auxiliary equipment	129
10.2 Cyclone separators	129
10.3 Pressurization units	129
10.4 Air coolers and heat exchangers	129
10.5 Rotameters and flow rate controllers	130
10.6 Leakage detectors	130
10.7 Pressure sensitive switches	130
10.8 Strainers and filters	130
<b>Chapter 11— Seal storage, handling and installation</b>	<b>131</b>
11.1 Seal storage	131
11.2 Seal handling	131
11.3 Seal installation	131
11.4 Installation considerations	132
11.5 Seal squareness	132
<b>Chapter 12— Seal selection and standards</b>	<b>137</b>
12.1 General selection considerations	137
12.2 Process liquid characteristics	137
12.3 Inboard vs outboard mounting	138
12.4 Rotating versus stationary seal ring	138
12.5 Face loading	138
12.6 Primary seal ring design	139
12.7 Secondary sealing devices	139
12.8 Seal selection rules	139
12.9 Mechanical seal standards	139
<b>Chapter 13— Seal Failures</b>	<b>143</b>
13.1 Factors influencing seal life	143
13.2 Factors influencing seal performance	145
13.3 Categorization of seal failures	147
13.4 Seal malfunction and probable causes	147
13.5 Premature seal failure causes	148
13.6 Seal face Symptoms	149
13.7 Friction and wear	154
<b>Chapter 14— Troubleshooting failed seals</b>	<b>157</b>
14.1 Troubleshooting failed seals	157
14.2 At the pumping site	157
14.3 Leakage types	159
14.4 Troubleshooting failed seals at equipment teardown	161

Chapter 15— How to maximize mechanical seal life	169
15.1 How to maximize mechanical seal life	169
15.2 Preparing the pump	169
15.3 Controlling the temperature in the stuffing box	170
15.4 Controlling the pressure in the stuffing box	170
15.5 Which mechanical seal to choose?	171
15.6 What face combination and elastomer?	179
Appendix A: Practical exercises	185
Appendix B: Answers to exercises	195
Appendix C: Practical problems	197
Appendix D: Answers to practical problems	199
