

Contents

1	Network Interface Layer: Ethernet	1
1.1	Introduction to Ethernet and its Origin	1
1.2	Progress and Evolution of Ethernet	1
1.3	Comparison Between Bluebook (V2) and IEEE 802.3	2
1.4	Basic Features of Ethernet	2
1.5	Function and Anatomy of Ethernet and its Frames	3
1.6	Ethernet MAC	4
1.7	Types of Message Addressing	4
1.8	Variants of Ethernet	5
1.9	Industrial Ethernet	10
1.10	Intrinsically Safe (Ex) Ethernet	14
1.11	Power over Ethernet (PoE)	16
1.12	Point-to-Point Protocol over Ethernet (PPPoE)	17
1.13	Summary	19
2	Internet Layer Protocols: IPv4	21
2.1	Introduction to Internet Protocol (IP)	21
2.2	Addresses and their Purposes	21
2.3	IPv4 Address Header Structure	22
2.4	IPv4 Address Notation	25
2.5	Address Classes	25
2.6	Subnet Mask and Subnetting	27
2.7	Variable Length Subnet Masking (VLSM)	27
2.8	Private versus Internet-unique IP address	30
2.9	Address Resolution Protocol (ARP)	30
2.10	Internet Control Message Protocol (ICMP)	32
2.11	Summary	34
3	Internet Layer Protocols: IPv6	35
3.1	IPv6/IPng	35
3.2	IPv6 Header Format	37
3.3	IPv6 Addresses	38
3.4	Unicast	39
3.5	Anycast Addresses	40
3.6	Multicast Addresses	41
3.7	Scope of IPv6 Addresses	41
3.8	ICMPv6	42
3.9	IPv6 Neighbor Discover (ND) Protocol	43
3.10	Summary	45
4	Host-to-Host and Application Layer Protocols	47
4.1	Introduction to the Host-to-Host Layer Protocols	47
4.2	Ports and Sockets	48
4.3	Transmission Control Protocol (TCP)	49
4.4	TCP Structure	51
4.5	TCP Connection	53
4.6	User Datagram Protocol (UDP)	55

4.7	Overview of Application Layer and Application Layer Protocols	56
4.8	Hyper Text Transfer Protocol (HTTP)	58
4.9	Hyper Text Transfer Protocol Secure (HTTPS)	59
4.10	File Transfer Protocol (FTP)	59
4.11	HTTP versus FTP	61
4.12	Secure FTP (SFTP)	62
4.13	Domain Name System (DNS)	63
4.14	Dynamic DNS (DDNS)	65
4.15	Simple Network Management Protocol (SNMP)	66
4.16	Simple Mail Transfer Protocol (SMTP)	66
4.17	Dynamic Host Configuration Protocol (DHCP)	67
4.18	APIPA – Automatic Private IP Addressing	68
4.19	Bootstrap Protocol (BOOTP)	69
4.20	Summary	71
5	Switching	73
5.1	Switched and the Mechanics of Switching	73
5.2	Hubs versus Switches	75
5.3	Bridges and the Bridging Process	75
5.4	L2 and L3 types of Switching	75
5.5	Managed versus Unmanaged Switching	76
5.6	Spanning Tree Protocols (STP)	76
5.7	Summary	79
6	Advanced Switching	81
6.1	Virtual LAN (VLAN)	81
6.2	Quality of Service (QoS) and DiffServ	86
6.3	Switch Rings and Redundancy	87
6.4	Redundancy Protocols	90
6.5	Port-based Authentication (IEEE 802.1X)	92
6.6	Link Aggregation/Trunking	93
6.7	Summary	94
7	Routing	95
7.1	Mechanics of Routing	95
7.2	Subnetting	96
7.3	VLSM and CIDR	99
7.4	Network Address Translation (NAT) and Masquerading	104
7.5	Port Forwarding	105
7.6	Summary	106
8	Advanced Routing	107
8.1	Autonomous Systems (AS)	107
8.2	Routing Metrics	108
8.3	Interior Gateway Protocol (IGP)	108
8.4	Exterior Gateway Protocol (EGPs)	113
8.5	Multi Protocol Label Switching (MPLS)	114
8.6	Summary	118

9	CCTV over IP	119
9.1	IP Cameras in CCTV	119
9.2	Analog versus IP cameras	120
9.3	Compression in Video Recording	120
9.4	Video Compression Formats	121
9.5	Bandwidth Requirements	122
9.6	Summary	122
10	Ethernet in Industrial Applications	123
10.1	What is MODBUS?	123
10.2	MODBUS Messaging Protocol	123
10.3	MODBUS Serial	125
10.4	Transmission Modes	127
10.5	MODBUS/TCP	129
10.6	OPC (OLE for Process Control)	133
10.7	Field Buses	134
10.8	Ethernet in Field Buses	136
10.9	Summary	146
11	Security	147
11.1	Introduction to Internet Security Problem	147
11.2	Access Control Lists (ACLs)	148
11.3	Filtering	148
11.4	Firewalls	149
11.5	Stateful Packet Inspection	150
11.6	What is VPN?	151
11.7	VPN Protocols	151
11.8	Authentication	153
11.9	Encryption: AES, TKIP	154
11.10	Secure Shell Tunneling	155
11.11	Summary	156
12	Wireless	157
12.1	Wireless Ethernet Backhuls	157
12.2	Ethernet Modems for PtP and PtMP Applications	158
12.3	IEEE 802.11: Industrial WLANs	159
12.4	IEEE 802.15.4: Industrial Mesh Networks	171
12.5	Authentication: IEEE 802.11i	178
12.6	Summary	180
	Appendix A	181
