

# Contents

<b>1</b>	<b>Overhead Conductor Design</b>	<b>1</b>
1.1	Inputs required for design	1
1.2	Design of electrical specifications of OH conductors	1
1.3	Design of mechanical specifications of OH conductors	3
<b>3</b>	<b>Cable Sizing</b>	<b>9</b>
2.1	Cable sizing issues	9
2.2	Cable selection calculations	10
<b>3</b>	<b>Design of a HV Switchboard Installation</b>	<b>13</b>
3.1	Introduction	13
3.2	Standardisation	13
3.3	Inputs	14
3.4	Design step-1: Basic equipment configuration	16
3.5	Design step-2: Ratings of equipment and devices	16
3.6	Switchboard	20
<b>4</b>	<b>Lightning Protection of Structures</b>	<b>23</b>
4.1	The Rolling Sphere Method (RSM) for analysis of lightning protection adequacy	24
<b>5</b>	<b>Touch and Step Potential</b>	<b>31</b>
5.1	Voltage of grounding system during faults	31
<b>Appendices</b>		
Appendix A –	Solutions to Calculations	39
Appendix B –	Design of Earthing Systems: Extract from AS2067	45
Appendix C –	Practical Examples	53
Appendix D –	Solutions to Practical Examples	61
Appendix E –	Substation Earthing Design: Worked Example	75
Appendix F –	Substation Earthing: Design Exercises	95
Appendix G –	Case Study: Earthing for a HV Zone Substation	105
Appendix H –	BS EN 61936-1:2010 Power Installations Exceeding 1 kV a.c. (UK standards)	109
