

Contents

1	Introduction to PLC and SCADA Systems	1
1.1	Introduction	1
1.2	PLC block diagram of components	2
1.3	PLC power supply	4
1.4	PLC processor module and memory	5
1.5	PLC input/output modules	13
1.6	SCADA hardware	18
1.7	Good installation practice	19
2	Fundamentals of PLC Software	35
2.1	Introduction	35
2.2	Methods of representing logic	36
2.3	Boolean algebra	46
2.4	Basic logic instructions code	49
2.5	Graphical representation-functional logic diagram	57
2.6	Ladder logic fundamentals: contacts, coils, timers, and counters	65
2.7	Advanced instructions	68
2.8	Startup/shutdown/fault routine	78
2.9	The seven good habits of PLC programming	86
3	SCADA Software	89
3.1	SCADA communication architectures	89
3.2	SCADA software blocks	92
3.3	HUMAN-machine interface	94
3.4	SCADA alarm management	95
4	Industrial Data Communication Systems	99
4.1	Roadmap for different standards	99
4.2	RS-232 and RS-485 interfaces	99
4.3	ProfiBus	110
4.4	DeviceNet	116
4.5	Industrial Ethernet	123
4.6	TCP/IP	127
4.7	MODBUS	136
5	Basics of Troubleshooting and Diagnostic Equipment	145
5.1	Common problems and solutions	145
5.2	How to quickly identify problems	145
5.3	Overall basic steps in troubleshooting	146
5.4	Communication issues	146
5.5	Earthing, shielding and noise	152

6	PLC Troubleshooting Road Map	161
6.1	Review of key PLC troubleshooting issues	161
6.2	Planning preventive PLC maintenance	163
6.3	Troubleshooting review	166
6.4	Error log-assisted troubleshooting	164
7	PLC Power and Earth	165
7.1	Introduction	165
7.2	Visual inspection	165
7.3	Measuring voltages	166
7.4	Power supply test	167
7.5	AC ripple on DC power supplies	168
7.6	Backup battery testing	169
7.7	Electromagnetic and radio frequency interference	170
7.8	AC grounding	175
8	Troubleshooting PLC Digital Inputs/Outputs	177
8.1	Internal memory status against the field activity	177
8.2	Digital input status	178
8.3	PLC output modules	180
8.4	Fuses	185
8.5	Forcing discrete inputs and outputs	186
8.6	Leaky input and output	187
8.7	Isolation problems	189
8.8	You have located the problem – what to do now?	190
8.9	Tracking down intermittent problems	190
9	Troubleshooting PLC Analog Input/Output	193
9.1	Analog input/output devices	193
9.2	Classification of analog PLC system	194
9.3	Analog input module	194
9.4	Single-ended and differential analog inputs	194
9.5	Analog output module	196
9.6	PLC analog signal processing	196
9.7	Forcing an analog output	197
9.8	Filtering and isolation issues	198
9.9	Isolated output modules	199
9.10	PLC troubleshooting analog input/output	200
10	Miscellaneous Hardware Issues	203
10.1	General maintenance of hardware	203
10.2	CPU description	204
10.3	CPU diagnostics	206
10.4	Troubleshooting CPU	207
10.5	What to do if you don't have the right replacement	209
10.6	PLC diagnostics	210
11	PLC Software Issues	215
11.1	How to return the program to its original state	215
11.2	Modifying an existing program	217
11.3	Modifying a program to trap problems	217

12	SCADA Troubleshooting Road Map	219
12.1	SCADA industrial control system	219
12.2	Troubleshooting issues	220
12.3	Tips for troubleshooting SCADA system	223
12.4	Effective use of Simatic WinCC premium diagnostic tools	227
12.5	Communication infrastructure and methods	227
13	Human Machine Interface (HMI)	231
13.1	Introduction	231
13.2	HMI device configuration	234
13.3	HMI server configuration	237
13.4	Troubleshooting remote I/O	245
13.5	Troubleshooting MODBUS I/O	246
14	SCADA Alarm Configuration Issues	249
14.1	SCADA alarm management	249
14.2	Alarm destination settings	250
14.3	Alarm event level settings	250
14.4	The software system configuration guide	250
14.5	Tag-based alarm monitoring	252
14.6	Device-based alarm monitoring	253
15	SCADA to PLC Interface Issues	255
15.1	SCADA protocols and drivers	255
15.2	Famous SCADA software	256
15.3	Throughput issues	256
15.4	Troubleshooting interfaces	257
16	Key Industrial Data Communications Problems and Troubleshooting	259
16.1	Cabling and hardware (switches/routers/converters)	259
16.2	Fiber-optic cables troubleshooting	265
16.3	Troubleshooting noise and interference	267
16.4	RS 485 issues	269
16.5	Industrial Ethernet	271
16.6	TCP/IP – troubleshooting	274
16.7	Troubleshooting Modbus	277
Appendices		279
	Appendix A – Practical Exercises - PLCs	279
	Appendix B – Practical Exercises – Industrial Data Communications	315
	Appendix C – Practical Exercises – Tuning of a PID Loop Block in a PLC or SCADA System	349
	Appendix D – Student Exercises - PLCs	361
	Appendix E – Student Exercises – PLCs - Answers	367
	Appendix F – How to Troubleshoot with a PLC	379
