<b>1</b>	<b>Introduction to Fluid Power</b>	<b>1</b>
1.1	Introduction	1
1.2	History of hydraulics	1
1.3	Advantages over electrical devices	2
1.4	Advantages over pneumatics	2
1.5	The energy transfer in a hydraulics field	2
<b>2</b>	<b>Physics Fundamentals for Hydraulic and Pneumatic Systems</b>	<b>5</b>
2.1	Physical properties	5
2.2	Mass	5
2.3	Weight	5
2.4	Volume	6
2.5	Density	7
2.6	Relative density or Specific gravity	7
2.7	Force	8
2.8	Work	9
2.9	Energy	9
2.10	Potential Energy	10
2.11	Kinetic Energy	10
2.12	Internal Energy	11
2.13	Power	12
2.14	Horse Power	12
2.15	Torque	12
2.16	Heat	13
<b>3</b>	<b>Pressure, Pressure Laws and Flow</b>	<b>15</b>
3.1	Pressure	15
3.2	Vapor Pressure	18
3.3	Hydrostatic principles	20
3.4	Hydrostatic laws	20
3.5	Static fluid pressure	21
3.6	Fluid pressure measurement	21
3.7	Pascal's Law	22
3.8	Flow and flow rate	22
3.9	Fluid velocity in hydraulic circuits	23
3.10	Types of flow in hydraulic circuits	24
3.11	Bernoulli's Equation	25
3.12	Friction	28
3.13	Viscosity	29
3.14	Absolute or dynamic viscosity	30
3.15	Kinematic viscosity	30
3.16	Viscosity index	31
3.17	Lubrication and lubricity	32

4	Hydraulic Pumps	33
4.1	Introduction	33
4.2	Pumping Principles	33
4.3	Pump classifications	34
4.4	Standard parameters of pump selection	34
4.5	External gear pumps	36
4.6	Functional description of external gear pumps	36
4.7	Direction change facility in external gear pumps	37
4.8	Sizing of external gear pumps	37
4.9	Characteristics curves – external gear pumps	39
4.10	Applications, advantages and disadvantages	39
4.11	Functional description of internal gear pumps	40
4.12	Sizing of internal gear pumps	40
4.13	Characteristics curves – internal gear pumps	42
4.14	Applications, advantages, and disadvantages	42
4.15	Vane pumps	43
4.16	Functional description of single-chamber vane pumps	44
4.17	Functional description of double-chamber vane pumps	44
4.18	Single-cartridge vane pumps	45
4.19	Double-cartridge vane pumps	45
4.20	Sizing of vane pumps	46
4.21	Characteristic curves – vane pumps	47
4.22	Applications, advantages and disadvantages	48
4.23	Vane pumps – variable displacement	49
4.24	Characteristic curves – variable vane pumps	51
4.25	Gerotor pumps	51
4.26	Functional principles of gerotor pumps	52
4.27	Sizing of gerotor pumps	52
4.28	Applications of gerotor pumps	52
4.29	Characteristic curves – gerotor pumps	53
4.30	Lobe pumps	53
4.31	Functional principles of lobe pumps	54
4.32	Sizing of lobe pumps	55
4.33	Characteristic curves – lobe pumps	56
4.34	Applications, advantages, disadvantages	56
4.35	Radial piston pump –fixed displacement	57
4.36	Functional description of radial piston pumps	58
4.37	Sizing of radial piston pumps	59
4.38	Applications, advantages, and disadvantages	60
4.39	Characteristic curves – radial piston pumps	60
4.40	Axial piston pumps	61
4.41	Axial piston pumps – fixed displacement	61
4.42	Characteristic curves – fixed displacement piston pumps	62
4.43	Functional description – axial piston swash plate variable pumps	63
4.44	Sizing of axial piston swash plate pumps	64
4.45	Characteristic curves - axial piston swash plate pumps	65
4.46	Axial piston bent - axis pumps	65
4.47	Functional description of bent - axis pumps	66
4.48	Sizing of axial piston bent-axis pumps	67
4.49	Characteristic curves - bent-axis axial piston pumps	68
4.50	Application of bent-axis axial piston pumps	69

<b>5</b>	<b>Hydraulic Motors</b>	<b>71</b>
5.1	Introduction	71
5.2	Performance characteristics of hydraulic motors	71
5.3	Classification of hydraulic motors	73
5.4	External gear motors	73
5.5	Functional description of external gear motors	74
5.6	Sealing arrangements in external gear motors	74
5.7	Additional features in external gear motors	75
5.8	Sizing of external gear motors	76
5.9	Characteristic curves of external gear motors	77
5.10	Applications, advantages and disadvantages	78
5.11	Internal gear motors	79
5.12	Functional description of direct drive gerotor motors	79
5.13	Functional description of spool valve type gerotor motors	80
5.14	Functional description of spool valve type geroler motors	80
5.15	Functional description of disc valve type geroler motors	81
5.16	Functional description of valve-in-star geroler motors	83
5.17	Sizing of internal gear motors	84
5.18	Characteristic curves for gerotor and geroler motors	85
5.19	Applications, advantages and disadvantages	85
5.20	Vane motors	86
5.21	Functional description of vane motors	86
5.22	Sizing of vane motors	88
5.23	Characteristic curves for vane motors	89
5.24	Applications	89
5.25	Radial piston motors	89
5.26	Telescopic type radial piston motor	90
5.27	Functional description of telescopic radial piston motors	90
5.28	Characteristic curves for telescopic radial piston motors	90
5.29	Applications	91
5.30	Multi-cam lobe radial piston motors	91
5.31	Functional description of multi-cam lobe radial piston motors	91
5.32	Sizing of radial piston motors	93
5.33	Applications, advantages and disadvantages	94
5.34	Axial piston motors	94
5.35	Axial piston In-line fixed displacement swash plate motors	94
5.36	Axial piston bent-axis motors	95
5.37	Axial piston fixed displacement bent-axis motors	95
5.38	Axial piston variable displacement bent-axis motors	96
5.39	Axial piston dual displacement swash plate motors	96
5.40	Sizing of axial piston motors	97
<b>6</b>	<b>Hydraulic Cylinders</b>	<b>99</b>
6.1	Introduction	99
6.2	General classification of cylinders	99
6.3	Functional types	99
6.4	Cylinder construction types	104
6.5	Cylinder parts and material specifications	105
6.6	Cylinder mounting styles	109
6.7	Cylinder mounting considerations	111
6.8	Cylinder mounting accessories	113
6.9	Cylinders for special applications	115
6.10	Cylinder speed control	115

6.11	Cylinder piston rod strength in buckling	118
6.12	Sealing systems used in cylinders	122
6.13	Cylinders in automation	123
6.14	Common problems in cylinders	124
6.15	Sizing of hydraulic cylinders	127
<b>7</b>	<b>Hydraulic Directional Control Valves</b>	<b>129</b>
7.1	Functions of directional control valves	129
7.2	Classification of directional control valves	129
7.3	Number of service ports	130
7.4	Spool positions configuration	130
7.5	Valve element construction	130
7.6	Type of actuators for directional control valves	132
7.7	Spool valve element characteristics	133
7.8	Spool position changeover in valve operation	135
7.9	Direct-operated directional control valves	136
7.10	Pilot-operated directional control valves	141
7.11	Subplates and manifolds porting patterns	144
7.12	Non-return valves	147
7.13	Pilot-operated check valves	148
7.14	Pre-fill valves	150
<b>8</b>	<b>Hydraulic Pressure Control Valves</b>	<b>153</b>
8.1	Introduction	153
8.2	Pressure relief valves	155
8.3	Characteristics of pressure relief valves	159
8.4	Pressure-reducing valves	161
8.5	Pressure sequence valves	164
8.6	Counterbalance valves	165
8.7	Unloading valves	167
8.8	Brake valves	169
<b>9</b>	<b>Hydraulic Flow Control Valves</b>	<b>171</b>
9.1	Function of a flow control valve	171
9.2	Types of throttling points	172
9.3	Types of flow control valves	173
9.4	Application of two-way flow control valves	179
<b>10</b>	<b>Hydraulic Filters</b>	<b>185</b>
10.1	Function of filters in hydraulic systems	185
10.2	The contaminants	186
10.3	Mechanisms of filtration	187
10.4	Filter locations in hydraulic systems	190
10.5	Selection of filter media and applications	191
10.6	Constructional aspects of filters	195
10.7	Filter circuits	202
10.8	Accessories for filters	202

<b>11</b>	<b>Electro-Hydraulic Systems</b>	<b>203</b>
11.1	Introduction	203
11.2	Operation of proportional valves	205
11.3	Use of DC coils in proportional valves	205
11.4	Amplifier cards	206
11.5	Classification of proportional valves	207
11.6	Proportional directional control valves	207
11.7	Proportional pressure relief valves	211
11.8	Proportional pressure-reducing valves	213
11.9	Proportional flow control valves	215
11.10	Servo valve technology	218
11.11	Comparison of proportional and servo technology	218
11.12	First stage of servo valves	219
11.13	Application of a flapper jet design	221
11.14	Servo valve calculations	225
11.15	The difference between proportional and servo valves	228
<b>12</b>	<b>Hydraulic Accessories</b>	<b>229</b>
12.1	Hydraulic oil reservoirs	229
12.2	Hydraulic tubes and fittings	236
12.3	Hydraulic hoses and fittings	241
12.4	Hydraulic accumulators	249
12.5	Heat exchangers	258
<b>13</b>	<b>Hydraulic Fluids</b>	<b>265</b>
13.1	Introduction	265
13.2	Functions of hydraulic oil	265
13.3	Performance characteristics of hydraulic oil	266
13.4	Hydraulic oil groups	273
13.5	Oil additives	276
13.6	Common problems with hydraulic oil	279
13.7	Oil sampling points	285
13.8	Oil cleanliness	286
13.9	Oil condition monitoring and contamination removal	288
13.10	Fluid change intervals	289
13.11	Storage and maintenance of oil stock	290
<b>14</b>	<b>Seal Design in Hydraulic Components</b>	<b>295</b>
14.1	Introduction	295
14.2	Seal Types	296
14.3	Piston Seals	296
14.4	Gland (headend) seals	299
14.5	Guide rings in piston and gland assembly	301
14.6	Cylinder barrel seals	302
14.7	Seals used in telescopic cylinders	303
14.8	General seal materials for piston, rod, wiper and O-ring seals	306
14.9	Storage and shelf life of seals	309
14.10	O-rings and their applications	310
14.11	O-ring materials	313
14.12	Practical aspects of seal failures - descriptions	316
14.13	Practical aspects of seal failures - illustrated	317

14.14	O-ring failures	319
14.15	O-ring failure analysis	320
14.16	Practical aspects of O-ring failures	321
14.17	Typical seal configuration from manufacturers	326
<b>15</b>	<b>Basic Hydraulic Circuits</b>	<b>337</b>
15.1	Types of hydraulic circuits	337
15.2	Basic understandings of open circuits	339
15.3	Hydraulic circuit illustration in documents	340
15.4	Integrated hydraulic circuits	342
15.5	Sub-circuits	343
<b>16</b>	<b>Maintenance and Troubleshooting</b>	<b>375</b>
16.1	Introduction	375
16.2	Construction of hydraulic systems	375
16.3	Commissioning preparation	379
16.4	Cleanliness in hydraulic systems	381
16.5	Hydraulic system maintenance classifications	382
16.6	Troubleshooting hydraulic components	387
16.7	Hydraulic maintenance documentation	401
16.8	Maintenance equipment	402
<b>17</b>	<b>Air Preparation, Generation and Distribution in Pneumatic Systems</b>	<b>407</b>
17.1	Characteristics of air	407
17.2	Characteristics of pneumatic systems	408
17.3	Air generation, preparation and distribution	409
<b>18</b>	<b>Pneumatic Symbols and Standards</b>	<b>415</b>
18.1	Standards	415
18.2	Symbols	416
<b>19</b>	<b>Pneumatic Elements</b>	<b>427</b>
19.1	Basic Structure of Pneumatic Control System	427
19.2	Components of pneumatic systems	428
19.3	Compressors	429
19.4	Directional control valves	432
19.5	Flow control and pressure valves used in pneumatic circuits	438
19.6	Other valve types	441
19.7	Actuators	444
<b>20</b>	<b>Basic Pneumatic Circuit Design</b>	<b>451</b>
20.1	Operation of single and double acting cylinders	451
20.2	Timing system for cylinder extend and retract cycle	453
20.3	Speed and safety control systems	453
<b>21</b>	<b>Troubleshooting and Fault Finding in Pneumatic Systems</b>	<b>457</b>
21.1	Maintenance requirements for pneumatic systems	457
21.2	Guidelines for maintenance of system components	458
21.3	Troubleshooting pneumatic system problems	460
