

Technology Training that Works

Programmable Logic Controllers (PLCs) and SCADA Systems

Contents

1	Background to SCADA	1
1.1	Introduction and brief history of SCADA	
1.2	Fundamental Principles of Modern SCADA Systems	
1.3	SCADA Hardware	
1.4	SCADA Software	
1.5	Landlines for SCADA	
1.6	SCADA and Local Area Networks	
1.7	Modem Use in SCADA Systems	
1.8	Computer Sites and Troubleshooting	
1.9	System implementation	
2	SCADA Systems Hardware	11
2.1	Introduction	
2.2	Comparison of the Terms SCADA, DCS, PLC and Smart Instruments	
2.3	Remote Terminal Units	
2.4	Application Program	
2.5	PLCs used as RTUs	
2.6	The Master Stations	
2.7	System Reliability and Availability	
2.8	Communication Architectures and philosophies	
2.9	Typical Consideration in Configuration of Master Station	
3	SCADA Systems Software	67
3.0	Introduction	
3.1	The Components of a SCADA System	
3.2	The SCADA Software Package	
3.3	System Response Times	
3.4	Specialized SCADA Protocols	
3.5	Error Detection	
3.6	Distributed Network Control	
3.7	New Technologies in SCADA Systems	
3.8	The Twelve Golden rules	
4	Landline Media	105
4.1	Introduction	
4.2	Background to Cables	

Technology Training that Works

- 4.3 Definition of Interfaces and Noise on Cables
- 4.4 Sources of Interference and Noise on Cables
- 4.5 Practical Methods of Reducing Noise and Interference on Cables
- 4.6 Types of Cables
- 4.7 Privately Owned Cables
- 4.8 Public Network Provided Services
- 4.9 Switched Telephone Lines
- 4.10 Analogue Tie Lines
- 4.11 Analogue Data Services
- 4.12 Digital Data Services
- 4.13 Packet Switched Services
- 4.14 ISDN
- 4.15 ATM

5	Local Area Networks (LAN's)	151
5.1	Objectives	
5.2	Introduction	
5.3	Ethernet	
5.4	Industrial Ethernet	
5.5	Connecting and Cabling	
5.6	Packaging	
5.7	Deterministic verses stochastic operation	
5.8	Size and Overhead of Ethernet frame	
5.9	Noise and Interference	
5.10	Partitioning of the networking	
5.11	Switching technology	
5.12	Power on the Bus	
5.13	Architectures for high Availability	
5.14	TCP/IP	
5.15	IP	
5.16	Host-to-host layer; End-to-end reliability	
5.17	LAN Connectivity Components	
5.18	Wireless LAN	
5.19	OPC Connectivity	
5.20	Exchange of information between Server and Client	
5.21	Address space browsing and item IDs	
5.22	Creations of objects and access to properties	
6	Industrial Communication Protocols	223
6.1	Introduction	
6.2	RS-232	
6.3	RS-485	
6.4	Fieldbus	
6.5	Modbus	

Technology Training that Works

7	SCADA Network Security	251
7.1	Introduction	
7.2	WAN Connection to Control Centre	
7.3	SCADA Network Security Issues	
	Appendix A	263
	Glossary of Terms	
	Appendix B	286
	Interface Standards	
	Appendix C	291
	CITECT Practical	
	Appendix D	329
	SCADA Practical on Modbus CITECT
