

Technology Training that Works

Practical Batch Management & Control (Including S88) for Industry

Contents

Preface	xi
1 Introduction	1
1.1 Introduction	1
1.2 Identification of batch processes	2
1.3 Background of the need for integrated batch systems	10
1.4 Overview of batch systems' engineering	12
1.5 Introduction to standards	16
2 Identify and define physical models	21
2.1 Introduction	21
2.2 Define the physical model	25
2.3 Define tags	29
3 Identify and define process models, actions, operations and stages	31
3.1 Introduction	31
3.2 Process model	32
3.3 Relationship between process model and physical model	34
4 Identify and define procedural models	37
4.1 Introduction	37
4.2 Procedural model	37
4.3 Concept of equipment entities	40

Technology Training that Works

5	Introduction to recipes	45
5.1	Introduction	45
5.2	S88 recipe model	47
5.3	Types of recipes	48
5.4	Building recipe procedures	53
6	Batch manufacturing basics	59
6.1	Introduction	59
6.2	Batch numbering, tracking and reporting	59
6.3	Batch planning and scheduling	61
7	Batch and sequence programming fundamentals	75
7.1	Introduction	75
7.2	Techniques for batch control elements	75
7.3	Implementation	76
7.4	Interaction with continuous process sections	81
8	Practical techniques in sequence control design	83
8.1	Introduction	83
8.2	Programming PLCs/DCS	83
8.3	Practical methods of functional specification	87
8.4	Defining equipment procedures	88
8.5	Phase logic programming	89
8.6	Phase logic interface	92
9	Operator and supervisor interface	101
9.1	Introduction	101
9.2	Display screens for batch management	102
9.3	Guidelines for building user interfaces	103
9.4	Consideration of human and ergonomic factors	105
10	Batch management issues	109
10.1	Introduction	109
10.2	Control activity model	109

Technology Training that Works

10.3	Practical problems in batch management	113
10.4	Implementation of safety issues in batch management	114

11	Batch control technologies	119
-----------	-----------------------------------	------------

11.1	Introduction	119
11.2	Overview of DCS/PLC architecture	119
11.3	Integration of batch control & ERP systems	122
11.4	Standards for enterprise/control systems integration	128
11.5	Sending process quality and production reports back to ERP	132

12	Practical software project planning and implementation	135
-----------	---	------------

12.1	Introduction	135
12.2	What to look for in batch software packages	136
12.3	Batch control software products	141

Exercise 1-5	153-164
---------------------	----------------

Solution 1-5	165-174
---------------------	----------------

Appendix-A	175
-------------------	------------

Appendix-B	181
-------------------	------------

Appendix-C	193
-------------------	------------

Glossary	201
-----------------	------------
