

Technology Training that Works

Practical Pumps and Compressors: Control, Operation, Maintenance & Troubleshooting

Contents

1.0	Compressors	1
1.1	What is a Compressor?	3
1.1.1	Positive Displacement Compressors	3
1.1.2	Reciprocating compressors.....	4
1.1.3	Screw compressors.....	5
1.1.4	Vane compressors.....	6
1.1.5	Lobe compressors.....	7
1.1.6	Liquid ring/piston compressors.....	8
1.1.7	Diaphragm compressors.....	9
1.1.8	Dynamic compressors.....	9
1.2	Compressor definitions.....	10
1.2.1	Gauge pressure.....	10
1.2.2	Absolute pressure.....	10
1.2.3	Absolute temperature.....	11
1.2.4	Pressure ratio.....	11
1.2.5	Capacity.....	11
1.2.6	Stages.....	12
1.2.7	Basic criteria for compressor selection.....	12
2.0	Reciprocating Compressors	15
2.1	Principle	17
2.2	Mechanics	18
2.3	Reciprocating Compressor Definitions	18
2.3.1	Piston Displacement	18
2.3.2	Volumetric Efficiency	19
2.4	Parts of Reciprocating Compressor	19
2.4.1	Frame or Crankcase	19
2.4.2	Crankshaft	19
2.4.3	Main Bearings	20
2.4.4	Connecting Rods	20

Technology Training that Works

2.4.5	Crosshead	20
2.4.6	Cylinder	21
2.4.7	Liner	22
2.4.8	Piston	22
2.4.9	Piston Rods	23
2.4.10	Piston and Rider Rings	23
2.4.11	Rod Packing Rings	27
2.4.12	Oil Wiper Rings	29
2.4.13	Compressor Valves	30
2.5	Maintenance of Reciprocating Compressors	34
2.5.1	TDC /BDC Checks	34
2.5.2	Rider Ring Projections	34
2.5.3	Piston Ring End Gaps	34
2.5.4	Valve Condition	35
2.5.5	Cylinder Dimensions	35
2.5.6	Piston and Piston Rods	36
2.5.7	Packings and Oil Wiper Rings	36
2.5.8	Packing Cases	38
2.5.9	Crosshead	39
2.5.10	Connecting Rod	39
2.5.11	Crankshaft	39
2.5.12	Other Important Checks	39
2.5.13	Intercoolers, Crankcase, Gear Box Oil Coolers, CWJ	
2.5.14	Lube Oil and Filters	
2.5.15	Process Strainers	
2.5.16	RV's, NRV's, Regulators	
2.5.17	Pulsation bottles	
2.5.18	Vents, Breathers, Tubings	
2.5.19	Lube Oil Pumps	
2.5.20	Flywheels	
2.5.21	Coupling	
2.5.22	Motor	
2.5.23	Instrumentation	
2.6	Performance of Reciprocating Compressor	42
2.6.1	Piston Displacement	42
2.6.2	Volumetric Efficiency	42
2.6.3	Inlet Capacity	44
2.6.4	Piston Speed	44
2.6.5	Discharge Temperature	44
2.6.6	Interstage Pressure	44
2.6.7	Adiabatic Head	45
2.6.8	Adiabatic Power	45
2.6.9	Shaft Power	46
2.7	Mechanical Forces	46
2.7.1	Gas Forces	46
2.7.2	Inertia Forces	47

Technology Training that Works

- 2.7.2.1 Inertia Forces – Rotating
- 2.7.2.2 Inertia Forces – Oscillating

Centrifugal Compressors 49

2.8	Introduction	51
2.9	Principle of Centrifugal Compressors	51
2.10	Operation of Centrifugal Compressors	51
2.11	Parts of Centrifugal Compressors	53
	2.11.1 Casing	53
	2.11.2 Impeller (22016) (18003)	54
	2.11.3 Shaft	54
	2.11.4 Shaft and Impeller Seals	55
	2.11.5 Process Seals	58
	2.11.6 Shaft Mechanical Seal (Iso Carbon Seal)	
	2.11.7 Dry Gas Seal	
	2.11.8 Bearings	60
	2.11.9 Journal Bearings	
	2.11.10 Thrust Bearings	
	2.11.11 Magnetic Bearings	
	2.11.12 Couplings	65
2.12	Casing Configurations	67
2.13	Types of Compressors	68
	2.13.1 Multistage Horizontal Compressors	68
	2.13.2 Vertically Split Casing Compressors	68
	2.13.3 Pipeline Compressors	69
	2.13.4 Single Stage Compressors / Blowers	69
	2.13.5 Integrally Geared Compressors	70
2.14	Performance of Centrifugal Compressor	71
2.15	Polytropic compressor	71
2.16	Characteristic Curve of Centrifugal Compressor	73
	2.16.1 Surging	75
	2.16.2 Stonewall or Choke	76
	2.16.3 Critical Speed of Compressor Rotor	76
2.17	Compressor Controls	78
	2.17.1 Suction Throttle Control	78
	2.17.2 Speed Control	78
	2.17.3 Inlet Guide Vane Control	78
	2.17.4 Diffuser Vane Control	79

3.0 Gas Properties and Thermodynamics 81

4.1.1	Gas laws and properties.....	83
4.1.2	Boyle’s Law.....	83
4.1.3	Charles’s Law.....	83

Technology Training that Works

4.1.4	Dalton's Law.....	83
4.1.5	Avogadro's Law.....	83
4.1.6	Ideal Gas Law.....	84
4.1.7	Compressibility.....	84
4.1.8	Critical pressure and temperature.....	85
4.1.9	Specific heat of gases.....	85
4.2	Calculating properties of a gas mixture.....	85
4.2.1	Calculating molecular weight of a gas mixture.....	86
4.2.2	Calculating specific heats of a gas mixture.....	86
4.2.3	Calculating critical pressure of a gas mixture.....	86
4.2.4	Calculating critical temperature of a gas mixture.....	87
4.2.5	Mollier diagrams.....	87
4.3	Thermodynamic basics.....	88
4.3.1	Internal energy.....	88
4.3.2	Enthalpy.....	92
4.3.3	Adiabatic compression.....	95
4.3.4	Polytropic compression.....	97
4.3.5	Summarizing the thermodynamic processes.....	98
4.3.6	Work done for adiabatic compression.....	98
4.3.7	Work done for polytropic compression.....	100
4.3.8	Adiabatic compression efficiency.....	101
4.3.9	Polytropic compression efficiency.....	101
4.3.10	Mechanical efficiency.....	103
4.3.11	Minimum work in a multistage compressor.....	103
