

Technology Training that Works

Practical Embedded Controllers: Troubleshooting and Design

Contents

Chapter 1	Introduction	1
	A. CPU Design and Functions	1
	B. Assembly Language Programming	2
	C. Memory Mapping	3
	D. Inputs and Outputs	4
	E. Noise Reduction	5
	F. Data Communication	6
	G. Grounding Solutions	7
	H. Installation Technics	8
<hr/>		
1.	CPU Design and Functions	9
	A. Number Systems –Binary, Hexadecimal, and Decimal	9
	B. Gates – And, OR, XOR and NOT gates	10
	C. Registers – X, Y and D	11
	D. Accumulators A and B	12
	E. Ports A, B, C and D	13
	F. Communications – Synchronous and Asynchronous	14
	G. Power Systems – Reset and brownouts	15
	H. Crystals and Oscillators	16
<hr/>		
2.	Programming	17
	A. Load, Stores and Transfers	17
	B. Arithmetic Operations	18
	C. Logical Operations	19
	D. Shifts and Rotates	20
	E. Stacks and Indexes	21
	F. Condition Code Register	22
	G. Branches, Jumps and Calls	23
	H. Interrupts and Misc	24
	I. Basic and C++	25
	J. Programming Structure and Specifications	26
<hr/>		
3.	Memory Mapping	27
	A. User Ram	27
	B. Buffalo Stack and Variables	28

Technology Training that Works

C. Interrupt Pseudo-Vectors	29
D. User Ram	30
E. Control Registers	31
F. EEPROM	32
G. RAM and EPROM Socket	33
<hr/>	
4. Inputs and Outputs	34
<hr/>	
A. Single Ended vs. Differential Inputs	35
B. Digital Inputs	36
C. Digital Outputs	37
D. Analog Inputs	38
E. Digital Control of Analog Devices – ie Stepper Motors	39
F. Keyboard Interfacing	40
G. LCD Interfacing	41
H. Timers	42
<hr/>	
5. Noise Reduction	43
<hr/>	
A. Conductive Noise on PCB's and in the field	43
B. Electrostatic Noise on PCB's and in the field	44
C. Magnetic noise on PCB's and in the field	45
D. Noise Reduction Technics in PCB's	46
E. Noise Reduction Technics in Cable Installation	47
F. Out Going Radio Frequency Noise Reduction	48
G. In Coming Radio Frequency Noise Reduction	49
H. Analog and Digital Filtering	50
<hr/>	
6. Data Communication	51
<hr/>	
A. Basics of Serial Data Communication	52
B. ASCII	53
C. RS 232	54
D. RS 422	55
E. RS 485	56
F. Fibre Optic Cables	57
G. USB	58
H. Fieldbus Protocols used in Controllers	59
I. OSI Model	6
<hr/>	
7. Grounding Solutions	61
<hr/>	
A. Grounding on a PCB	62
B. Protecting PCB from Lightning	63
C. Controller Equipment Grounds	64
D. Protecting Controllers from Lightning	65
E. Enclosure Grounds	66
F. Spiked Earth Grounds	67
G. Cable Trench Grounds	68
H. Tower Lightning Protection	69

Technology Training that Works

8. Installation Technics	70
A. Connections – Screw, Crimp and Solder	71
B. Cable Runs and Trays	72
C. Cable Ties and Mounting	73
D. Cooling, Heating and Air Conditioning	74
E. Solar Power	75
F. Fitting PCB's in the Box	76
G. Designing for Repairability	77
H. Conduit Installation	78
I. Safety Considerations	79

9. Conclusion	80
A. CPU Design and Functions	80
B. Assembly Language Programming	81
C. Memory Mapping	82
D. Inputs and Outputs	83
E. Noise Reduction	84
F. Data Communication	85
G. Grounding Solutions	86
H. Installation Technics	87

Appendix 1	68HC11 Instruction Set	88
Appendix 2	HC11 EVM Users Information	108
Appendix 3	ASM11 Users Information	118
Appendix 4	Procomm Users Information	125
Appendix 5	PAT Software Users Information	130
Appendix 6	Sample Programs	140
Appendix 7	Thumbnails of Course Slides	150
Appendix 8	Figure List	200
Appendix 9	Practicals	220
