

Technical Information that Works

Inspection, Testing and Commissioning of Electrical Switchboards, Circuit Breakers, Protective Relays, Cables and PLCs

Contents

1	Fundamentals of Switchgear	1
1.1	Single Line Diagram	1
1.2	Typical Construction – LV/MV and HV	2
1.3	Active and Passive Network Components	5
1.4	Circuit Breaker Utilisation	5
1.5	Fuse Switches	6
1.6	HV Fuses in Combination with and as an Alternative to Circuit Breakers	6
1.7	Auto-reclosers and Auto-reclose operations	7
2	Specifications of Switchgear	9
2.1	Switchgear ratings – Highest System and Impulse Withstand Voltages, Load and Short Circuit Currents	9
2.2	Simple and Complex Protection Schemes	14
2.3	Switchgear Ancillaries, Measurement CTs, VTs and Relays	14
2.4	Cable Terminations	17
2.5	Indoor and Outdoor Operation of Switchgear	19
3	Short Circuit Testing	21
3.1	Symmetrical and Asymmetrical Ratings	21
3.2	Make and Break Operations	22
3.3	Understanding Test Oscillograms	25
3.4	Case Study – Specification for a 132kV Switchboard	26
4	Switchgear Diagnostics, Testing and Maintenance	41
4.1	Asset Records	41
4.2	Condition Based Maintenance (CBM)	42
4.3	Reliability Centered Maintenance (RCM)	43
4.4	Switchgear Inspection Methodologies	45
4.5	Diagnostic Techniques	47
4.6	Principles of Circuit Breaker Maintenance	59
4.7	Oil Testing	65
4.8	Maintenance of Vacuum Circuit Breakers and SF6	69

4.9	Switchgear Defects and Defect Control	71
4.10	Switchgear Installations	73
5	Power System Protection Principles and Relays	79
5.1	Principles of Protection and Need for Protective Apparatus	79
5.2	Types of Faults	81
5.3	Types of Protection Systems	84
5.4	Types of Protective Relays	85
5.5	Electromechanical and Static Relays	86
5.6	Numerical Relays	95
6	Configuration of Numerical Relays	103
6.1	Introduction	103
6.2	Setting Approach in Conventional Relays	103
6.3	Configuring Numerical Relays	104
6.4	Configuration Security Through Passwords	108
6.5	Protection Settings as Part of a Configuration	109
6.6	Methods Adopted for Setting Numerical Relays	116
6.7	Examples of Front Panel Configuration Sequence	117
6.8	Configuration Exercises for Typical Relays/Simulation Software	122
7	Cabling Commissioning and Periodic Testing	125
7.1	Review of Codes for Testing	125
7.2	Drum Length Checks	127
7.3	Post Installation Checking	128
7.4	Pre-commissioning and Periodic Tests	129
7.5	Tests as Tools for Condition Monitoring and Early Failure Alarm	129
7.6	HV Tests Using DC and Very Low Frequency AC	130
7.7	Partial Discharge Tests and Mapping of Results	133
7.8	Dielectric Dissipation Factor Measurements	137
7.9	Micro Destructive and Non-Destructive Tests for Life Assessment	140
7.10	Operation and Maintenance of Cables	140
8	Cable Failure Modes and Fault Detection	141
8.1	Types of Failures	141
8.2	Reasons for Failures	142
8.3	Fault Location	146
8.4	Electrical Tests for Detection of Cable Faults	147
8.5	Safety Issues in Fault Detection	151
8.6	Analysis of Failures	153
9	Switchboard installation, inspection and commissioning	157
9.1	Receiving, Handling and Storage	157
9.2	Inspection	158
9.3	Installation	159
9.4	Type, Routine, Acceptance and Pre-commissioning Tests	161
9.5	High Voltage Equipment Test Techniques	162
9.6	Commissioning Procedures	163

10	Interface to Control Equipment (PLCs)	165
10.1	Overview of PLC	165
10.2	PLC I/O Modules	167
10.3	Pre-Commissioning Tests	170
10.4	Commissioning Procedures	171
10.5	Typical Faults	173
11	Case Studies of Typical Problems	175
11.1	Improper Circuit Breaker Trip Unit and Relay Settings	175
11.2	Motor Overload Protection	176
11.3	Medium Voltage Distribution System Installation Problems	177
11.4	Switchboard Metering Problems	178
11.5	Emergency Distribution Problems	178
11.6	Noisy Transformers	179
11.7	Incorrect Earthing and Neutrals	180
	Appendix 1	181
	Case Study: Circuit Breaker Related Failure	
	Appendix 2	183
	Quiz: Fundamentals of Switchgear	
	Appendix 3	185
	Quiz: Specifications of Switchgear	
	Appendix 4	187
	Simple Calculation of Short Circuit Currents	
	Appendix 5	197
	Quiz: Switchgear Diagnostics, Testing and Maintenance	
	Appendix 6	199
	Practical Exercises: Relay Coordination	
	Appendix 7	203
	Practical Exercises: Testing & Failure Modes and Fault Detection	
	Appendix 8	205
	Practical Exercises: Interface to Control Equipment	
	Appendix 9	213
	Group Discussion: Tests on HV and MV Equipment	
	Appendix 10	215
