# Practical Troubleshooting of Electrical Equipment and Control Circuits

---

## Contents

<b>1</b>	<b>Types of Problems</b>	<b>1</b>
1.1	Introduction	1
1.2	Problems and their genesis	2
1.3	Problem categories	2
<b>2</b>	<b>Troubleshooting Fundamentals</b>	<b>7</b>
2.1	Basics of troubleshooting	7
2.2	Drawings	10
2.3	Documentation and historical records	10
2.4	Skill set for troubleshooting	11
2.5	Relationships between early resolution of problems and plant productivity	11
<b>3</b>	<b>Use of Appropriate Instruments</b>	<b>13</b>
3.1	Instruments for troubleshooting	13
3.2	Insulation tester (Megger)	14
3.3	Continuity testers	15
3.4	Voltage indicator	15
3.5	Multimeter	16
3.6	Clamp-on meters	17
3.7	Ohm-meter and Ducter	17
3.8	Special instruments	18
<b>4</b>	<b>Troubleshooting Rotating Electrical Machines</b>	<b>21</b>
4.1	Basic principles of electrical machines	21
4.2	Rotating machines - AC	22
4.3	Rotating machines - DC	40
<b>5</b>	<b>Troubleshooting Transformers</b>	<b>47</b>
5.1	Basic principles	47
5.2	Transformer failures	48
5.3	Monitoring of transformer parameters and oil properties	52
5.4	Early warning of internal failures	52
5.5	Use of dissolved gas analysis for problem detection	52
5.6	Use of partial discharge detection/measurements	59

*Technology Training that Works*

5.7	Use of furan analysis/degree of polymerization tests for residual life prediction	60
5.8	Failures in auxiliary systems and tap changers	62
5.9	Case studies of typical transformer failures, analysis and remedial measures	62
<b>6</b>	<b>Troubleshooting Cable Problems</b>	<b>67</b>
6.1	Construction of HV and LV cables (Overview)	67
6.2	Joints and terminations	72
6.3	Types of cable failures and reasons	73
6.4	Detecting cable failures	80
6.5	Prevention of failures by proper jointing/termination quality and by periodic testing	88
6.6	Use of thermo-graph for hot spot detection	90
6.7	Case studies of typical failures and detection	90
<b>7</b>	<b>Troubleshooting Switchgear and Circuit Breakers</b>	<b>91</b>
7.1	Overview of HV, MV and LV switchgear	91
7.2	Basics of circuit breakers	92
7.3	Problems faced in power circuits of panels, remedies and prevention	94
7.4	Problems faced in circuit breakers	94
7.5	Problems caused by bad contacts	95
7.6	Internal short circuits due to rodents	96
7.7	Problems due to dust accumulation and dealing with them	96
7.8	Useful role of thermo-graphic examination in pre-empting problems	96
7.9	Case studies of failures/malfunctions and remedial measures	98
<b>8</b>	<b>Problems Caused by Poor Power Quality</b>	<b>99</b>
8.1	Overview of power quality	99
8.2	Effects of poor power quality on equipment	99
8.3	Voltage limits and equipment tolerance	101
8.4	Power factor and its effects	103
8.5	Problems due to frequency drifts	104
8.6	Voltage unbalance (negative sequence)	105
8.7	Harmonics (waveform distortion) and its effects on equipment	106
<b>9</b>	<b>Problems Associated with Electrical Control Circuits</b>	<b>107</b>
9.1	Devices and symbols	107
9.2	Language of control circuits	109
9.3	Reading and understanding electrical drawings	110
9.4	Reading and understanding ladder logic	111
9.5	Wire and terminal numbering	115

*Technology Training that Works*

9.6	Motor control circuits	118
9.7	Motor control strategies	122
9.8	Problems due to incorrect wiring	136
9.9	Problems due to poor terminal connections and contacts	137
9.10	Problems in power and control (auxiliary) contactors	137
9.11	Tracking problems using drawings and continuity/voltage tester	139
9.12	Precautions while performing insulation tests on control circuits	142
9.13	Case studies	143
<b>10</b>	<b>Troubleshooting PLCs</b>	<b>147</b>
10.1	Principles of programmable control	148
10.2	Programming tools	148
10.3	Typical controls using PLC	149
10.4	Problems experienced in PLC controls	149
10.5	Use of status lamps in I/O cards to troubleshoot	150
10.6	Rectification approach	150
10.7	Internal failures and diagnostics	151
<b>11</b>	<b>Troubleshooting Power Electronic Equipment</b>	<b>153</b>
11.1	Power electronic devices	153
11.2	Power electronic applications in industry	157
11.3	AC variable speed drive fundamentals	157
11.4	Controllers used for power electronic equipment	158
11.5	Device failures and checking of devices using simple instruments	160
11.6	Common problems faced in power electronic equipment, reasons and remedial measures	167
11.7	Examples/case studies	168
<b>Appendix A</b>	<b>Units and Abbreviations</b>	<b>169</b>
<b>Appendix B</b>	<b>Troubleshooting</b>	<b>171</b>
<b>Appendix C</b>	<b>Low Voltage Networks</b>	<b>191</b>
