

Technology Training that Works

Electrical Drawings and Schematics

Contents

1	Engineering Drawings for Electrical Engineers – An Introduction	1
1.1	Drawings - their relevance to engineering	1
1.2	Origin of worldwide standards in electro-technology	4
1.3	Purposes served by different types of drawings	5
1.4	Standards in a drawing office	12
1.5	Organization of a typical drawing office	17
1.6	Printing, distribution and control of copies	20
1.7	Summary	24
2	Components of a Drawing, Drawing Sizes and Scales	27
2.1	Typical engineering drawings	28
2.2	Various categories of electrical drawings	31
2.3	Planning your drawing	33
2.4	Title block in a drawing and what it should contain	40
2.5	Legend block	43
2.6	Bill of materials block	44
2.7	Drawing notes block	44
2.8	Revision history, revision numbering and use of revision marks	45
2.9	Summary	47
3	Symbols Used in Electro-technology and Governing Standards	49
3.1	Types of drawings that need symbols	49
3.2	Symbols as per electro-technology standards	52
3.3	Use of non standard symbols	70
3.4	Use of color and line types in representing various services	70
3.5	Company standards for drawings	72
3.6	Summary	73

Technology Training that Works

4	Single Line and Three Line Diagrams	75
4.1	Purpose	75
4.2	Typical examples	77
4.3	The differences between single line and the 3-line diagram	83
4.4	Applications	84
4.5	Conventions	85
4.6	Summary	90
	<i>Exercises</i>	91
5	Schematic Diagrams	93
5.1	Purpose	93
5.2	Typical examples	94
5.3	Control devices – electromechanical relays and contactors	97
5.4	Use of symbols	100
5.5	Applications	102
5.6	Schematics spread over a number of sheets	103
5.7	Cross referencing between coils and contacts	114
5.8	Summary	114
	<i>Exercises</i>	115
6	Logic Diagrams	117
6.1	Purpose	117
6.2	Logic gates	118
6.3	Typical examples	125
6.4	Symbols	126
6.5	Applications	128
6.6	Logic diagrams spread over a number of sheets	128
6.7	Cross referencing	130
6.8	Summary	130
	<i>Exercises</i>	130
7	Cabling and Wiring Drawings	135
7.1	Purpose	135
7.2	Sub types of cabling and wiring drawings	137
7.3	Conventions used	161
7.4	Summary	161
	<i>Exercises</i>	162

Technology Training that Works

8	Layout drawings	163
8.1	Purpose	163
8.2	Conventions used for layout drawings	164
8.3	Sub types of layout drawings	171
8.4	Applications of layout drawings	200
8.5	Summary	201
	<i>Exercises</i>	202
9	Advances arising from Computer Aided Drafting (CAD)	203
9.1	Drawing office revolution by CAD and the role of PC based CAD applications	203
9.2	2D and 3D applications and links to CAM	206
9.3	Drawing to true dimensions in CAD applications	212
9.4	Use of symbols, attributes and symbol libraries	214
9.5	Automated bill of material generation from a CAD drawing	221
9.6	Information sharing on multi-disciplinary drawing	221
9.7	Concept of layers and their use in sharing information	222
9.8	Automation of drawing through programming	224
9.9	Linking imagery with drawings – GIS related applications	232
9.10	Summary	239
10	Management of drawings	241
10.1	Planning and assigning of drawings	241
10.2	Need for drawing numbering standards	243
10.3	Drawing process flow	245
10.4	Revision control and ownership of drawing	248
10.5	Comments and their marking	248
10.6	Drawing management system for work flow control	249
10.7	On-line distribution of drawings – the end of the era of paper drawings	253
10.8	Drawing as a database for engineering and construction – the future	253
10.9	Summary	254
	Appendix A – Blank Drawing Sheet	257
	Appendix B – Answers to Exercises	259
