

Technology Training that Works

Practical Lubrication Engineering for Engineers and Technicians

Contents

1	Introduction to Lubrication Engineering	1
1.1	Objectives	1
1.2	Introduction	1
1.3	The role of lubricants, or, “Why use lubricants?”	2
1.4	Primary factors affecting selection of lubricants	2
1.5	Main areas of application	6
1.6	General guidelines on selection of lubricants	7
2	Friction, Tribology and Lubrication Regimes	9
2.1	Objectives	9
2.2	Friction	9
2.3	Mechanisms of dry friction	12
2.4	Friction under lubricated conditions	13
2.5	Conformal and counter conformal geometries of contact	15
2.6	Lubrication regimes	18
2.7	Lubricant film thickness in hydrodynamically lubricated journal bearings	21
2.8	Film thickness in hydrostatic bearings	23
2.9	Design charts for simple pads in hydrostatic lubrication	25
3	The Properties of Lubricants	29
3.1	Objectives	29
3.2	Introduction	29
3.3	Viscosity	29
3.4	Viscosity index	33
3.5	Selecting appropriate viscosity	35
3.6	Low temperature properties	39
3.7	High temperature properties	39
3.8	Chemical Stability	44
3.9	Biodegradability	44
3.10	Gravity and density	44
3.11	Color	44
3.12	Bulk modulus	44
3.13	Other properties	45

Technology Training that Works

4	Liquid Lubricants	47
4.1	Objectives	47
4.2	Introduction	47
4.3	Vegetable oils	47
4.4	Mineral oil lubricants	49
4.5	Synthetic base fluids and lubricants	52
4.6	Emulsions	60
5	Semi Liquid Lubricants	61
5.1	Objectives	61
5.2	Introduction	61
5.3	Composition of greases	62
5.4	Properties of greases	65
5.5	Mechanism of grease lubrication	68
5.6	Advantages (and disadvantages) of greases as lubrication	68
5.7	Selection and application	69
6	Solid and Gaseous Lubricants	71
6.1	Objectives	71
6.2	Solid lubricants	71
6.3	Gaseous lubricants	78
7	Additives	81
7.1	Objectives	81
7.2	Introduction	81
7.3	VI improvers and thickeners	81
7.4	Anti-wear and extreme pressure additives	83
7.5	Anti-oxidation additives	84
7.6	Anti-foaming agents	85
7.7	Detergents and dispersants	85
7.8	Other additives	85
8	Failure Analysis and Tribological Root Causes of Failures	87
8.1	Objectives	87
8.2	Introduction	87
8.3	Failure analysis	87
8.4	Methods for detecting and anticipating failure in lubricated Components	92
8.5	Some examples of failures	95
