

Technology Training that Works

Fundamentals of Mechanical Engineering

Contents

1	Basics of Mechanical Engineering	1
1.1	Introduction	1
1.2	Basic concepts	2
1.3	Units of engineering quantities	5
1.4	Friction	6
1.5	Summary	9
2	Mechanical Drawings	11
<i>A</i>	<i>Types of lines and letters used in drawings</i>	11
2.1	Types of lines	11
2.2	Lettering in the drawings	14
2.3	Summary for Section A	15
<i>B</i>	<i>Projections</i>	15
2.4	What is projection?	15
2.5	Pictorial projections	17
2.6	Concept of cutting plane and sectional views	18
2.7	Summary of Section B	23
<i>C</i>	<i>Dimensioning</i>	23
2.8	Different systems of dimensioning	23
2.9	Dimensioning practices	23
2.10	Summary of Section C	25
<i>D</i>	<i>Assembly drawings</i>	25
2.11	Summary of Section D	26
<i>E</i>	<i>Welded joints</i>	26
2.12	Types of welded joints	27
2.13	Summary of Section E	29
<i>F</i>	<i>Bolt, nut and screw fasteners</i>	29
2.14	Introduction	29
2.15	Summary of Section F	31
<i>G</i>	<i>Keys, keyways and keyed assemblies</i>	31
2.16	Types of keys	32
2.17	Summary of Section G	33
<i>H</i>	<i>Tolerance, limits and fits</i>	34
2.18	Concept of tolerance	34
2.19	Concept of limits	35
2.20	Concept of fit	36
2.21	Summary of Section H	37
<i>I</i>	<i>The role of CAD and CAM</i>	38
2.22	Use of computers for preparation of drawings	38

Technology Training that Works

2.23	CAD software	38
2.24	Computer Aided Manufacturing (CAM)	39
2.25	Summary of Section I	39
J	<i>Office practice</i>	39
2.26	Drawing number and part name	39
2.27	Summary of Section J	40
<hr/>		
3	Engineering Materials	41
<hr/>		
3.1	Mechanical properties of materials	41
3.2	Processing of metals and alloys	43
3.3	Stress and strain in metals	46
3.4	Normal stress and shear stress	48
3.5	Tensile and hardness testing	48
3.6	Stress and strain diagram	52
3.7	Alloy production and properties	55
3.8	Fracture of metals	60
3.9	Corrosion types and control	64
3.10	Summary	65
<hr/>		
4	Mechanical Design	67
<hr/>		
4.1	Introduction	67
4.2	Codes and standards	70
4.3	Design considerations	70
4.4	Factor of safety	76
4.5	Mechanical components	77
4.6	Fasteners/screwed joints	105
4.7	Fastener failure	111
4.8	Compression members	115
4.9	Summary	120
<hr/>		
5	Mechanical Engineering Codes and Standards	123
<hr/>		
5.1	Need for standardization	124
5.2	Overview of standards	124
5.3	Benefits of standardization	125
5.4	Mechanical engineering standards	126
5.5	ISO 9000/1	126
5.6	Six-sigma	128
5.7	Summary	129
<hr/>		
6	Manufacturing	131
<hr/>		
6.1	Foundry processing	131
6.2	Heat treatment	134
6.3	Hot working of metals	135
6.4	Cold working of metals	137
6.5	Pressing	139
6.6	Numerical control	142

Technology Training that Works

6.7	Sawing	146
6.8	Broaching	146
6.9	Shapers and shaping	147
6.10	Welding	147
6.11	Brazing	148
6.12	Computer-aided manufacturing	149
6.13	Manufacturing processes in oil and gas industry	150
6.14	Summary	150
7	Mechanical Automation	151
7.1	Sensors and actuators	151
7.2	Differential transformers	158
7.3	Velocity and motion	162
7.4	Fluid pressure measurement	164
7.5	Liquid flow measurement	165
7.6	Liquid level measurement	167
7.7	Temperature measurement	168
7.8	Light sensors	169
7.9	Selection of sensors	170
7.10	Pneumatics and hydraulics	170
7.11	Control valves	172
7.12	Cylinders	176
7.13	Electrical actuation	178
7.14	Electrical drives	180
7.15	Electrical machines	181
7.16	Gear motors	186
7.17	Control systems	187
7.18	Summary	192
8	Fluid Engineering	195
8.1	Pumps	195
8.2	Compressors	207
8.3	Turbines	211
8.4	Flow in pipes	217
8.5	Thermodynamics	223
8.6	Reversibility	228
8.7	Summary	229
9	Maintenance of Machinery	231
9.1	The need for maintenance	231
9.2	Types of maintenance	232
9.3	Maintenance strategies	233
9.4	Failure	234
9.5	How to select your maintenance plan	235
9.6	Predictive maintenance techniques	236
9.7	Summary	244

Technology Training that Works

10	Theory of Heat Transfer	245
10.1	Heat basics	245
10.2	Heat transfer	247
10.3	Laws of Thermodynamics	249
10.4	Thermal cycles	251
10.5	Heat cycles	258
10.6	Heat pumps	261
10.7	Air conditioning	263
10.8	Summary	264
	Exercises	265
	Answers	309
