

Technology Training that Works

Practical Motor Protection, Control and Maintenance Technologies

Contents

<i>Preface</i>	<i>i</i>	
1	Electric Motors	1
1.1	Fundamentals of Motor Technology	1
1.2	Basic Principles of Rotating Electrical Machines	1
1.3	Fundamental Principles of Speed Control	7
1.4	Efficiency, Torque, Inertia, Horsepower / Power Factor	9
1.5	Torque-speed Curves	14
1.6	Induction / Wound Rotor / Synchronous Motor Types	17
1.7	Basic Construction of a Motor	19
1.8	Principles of Operation and Performance	22
2	3-phase AC Induction Motors	27
2.1	Overview	27
2.2	Components of a Motor	28
2.3	Theory of Operation	32
2.4	Design of an Induction Motor	35
2.5	Duty Cycles	40
2.6	Insulation and Cooling Requirements	46
2.7	Starting Methods	50
2.8	Selecting Motors	52
2.9	Types of Faults, Fault Finding and Testing of AC Machines	55
2.10	Testing Instrumentation	60
3	Energy Losses and 3-phase AC Induction Motors	63
3.1	Introduction	63
3.2	Standards for Testing	64
3.3	Types of Losses	65
3.4	Determination of Efficiency of Large Motors	70

Technology Training that Works

3.5	Tests for Measurement and Computation of Losses and Efficiency	71
3.6	Dynamometers	78
3.7	Loading a Motor	79
3.8	Basics of Torque Measurement	83
3.9	Types of Practical Dynamometers	84
4	Motor Failure Analysis	93
4.1	Types of Motor Failure	93
4.2	Common Causes of Motor Failure	94
4.3	Modern Developments	103
5	Testing	107
5.1	Insulation Life and Resistance	107
5.2	Polarization Index	111
5.3	DC Hipot	112
5.4	DC Ramp Test	113
5.5	AC Hipot	113
5.6	Capacitance Test	114
5.7	Dissipation Factor	115
5.8	Partial Discharge	118
5.9	Surge Test	120
5.10	Mechanical Testing	125
5.11	Online Testing	127
6	Bearing Failure Analysis	129
6.1	The Bearing	129
6.2	Failure Analysis	132
6.3	Bearing Failures	133
6.4	Grease and Greasing	137
6.5	The Belt Drive	141
6.6	Balance	144
6.7	Storage Issues	146
6.8	Service Factor Loading	146

Technology Training that Works

7	Protection of Motors	149
7.1	Introduction	149
7.2	Stalling of Motors	155
7.3	Over Current / Overload	158
7.4	Under-voltage / Over-voltage	159
7.5	Under-frequency	160
7.6	Pole Slip / Out of Step	160
7.7	Loss of Excitation	161
7.8	Inadvertent Energization	161
7.9	Over Fluxing	161
7.10	Stall Protection / Acceleration Time	162
7.11	Negative Sequence Currents	164
7.12	Derating Factors	165
7.13	Earth Faults – Core Balance, Residual Stabilizing Resistors	166
7.14	Calculation of Protective Relay Settings	168
8	Motor Control	175
8.1	The Power Circuit	175
8.2	The Control Circuit	176
8.3	Motor Control: Troubleshooting	178
8.4	Synchronous Motor Controls	185
8.5	Motor Braking Methods	189
8.6	Speed Control	201
8.10	Slip Control AC Variable Speed Drives	211
8.11	Cycloconverters	216
8.12	Servo-drives	217
8.13	Reversing in Induction Motors	217
9	Control System for AC Variable Speed Drives	219
9.1	Introduction	219
9.2	The Overall Control System	220
9.3	Power Supply for the Control System	221
9.4	DC Bus Charging System	223
9.5	VSD Control Loops	225
9.6	Vector Control	230

Technology Training that Works

9.7	Basic Fixed V/f Drives	233
9.8	V/f Sensorless Flux-vector Drives (Open Loop Vector)	234
9.9	Closed-loop Field Oriented Vector Drives	235
9.10	Current Feedback in AC Variable Speed Drives	237
9.11	DC Bus Current Feedback	239
9.12	Speed Feedback from Motor	239
10	Installation and Fault Finding	241
10.1	General Information and Environmental Requirements	241
10.2	General Safety Requirements	241
10.3	Power Supply Connections and Earthing	244
10.4	Installing Contactors in Power Circuit	247
10.5	Installation of AC Converters into Metal Enclosures	249
11	New Technologies and Developments	255
11.1	Introduction	255
11.2	Energy Efficient Designs – the Modern Trend	256
Appendix A – Terminology Associated with Electric Motors		261
Appendix B – A Study of Efficiencies of Motors		275
Appendix C – Self-help Questions		279
Appendix D – Problems		285
Appendix E – Case Studies		289
Appendix F – Answers to the Problems		293
Appendix G – Answers to the Self-help Questions		309

Technology Training that Works

Appendix H – Answers to the Case Studies	313
Appendix I – Practical Exercises	317
Appendix J – Solutions to Practical Exercises	321
Appendix K – Bibliography	327
