# Practical Corrosion Management

---

## Contents

<b>1</b>	<b>Introduction to corrosion</b>	<b>1</b>
1.1	Introduction	1
1.2	Definition of corrosion	2
1.3	Types of corrosion	2
1.4	Cost of corrosion	4
1.5	Summary	5
<b>2</b>	<b>Basic Metallurgy and Electrical Concepts</b>	<b>7</b>
2.1	Introduction to metallurgy	7
2.2	Defects in metals	9
2.3	Iron-carbon phase diagrams	12
2.4	Common ferrous and non-ferrous metals/alloys	13
2.5	Basic electrical concepts	13
2.6	Summary	15
<b>3</b>	<b>Fundamentals of Corrosion</b>	<b>17</b>
3.1	Thermodynamic aspects of aqueous corrosion	17
3.2	Aqueous corrosion kinetics	19
3.3	Effect of concentration	20
3.4	Electrode potentials, anodic and cathodic reactions	22
3.5	Potential measurement with reference electrode, standard redoxpotential	22
3.6	EMF series	23
3.7	Exchange current density	24
3.8	Mixed potential theory	24
3.9	E-log (i) Evans diagram	25
3.10	Corrosion cells	26
3.11	Tafel equation and Tafel plot for corrosion rate determination	28
3.12	Linear polarization and stern geary equation	29
3.13	Types of polarization and rate controlling step	30
3.14	Passivity and passivation behavior of iron in nitric acid	32
3.15	Effect of temperature and pressure on rate of corrosion	33
3.16	Effect of velocity on rate of corrosion	33
3.17	Definition and effect of pH	34
3.18	Dissolved gases and importance of dissolved oxygen	35
3.19	Summary	36

*Technology Training that Works*

<b>4</b>	<b>Oxidation</b>	<b>37</b>
4.1	Oxidation of metal and alloys	37
4.2	Oxidation resistance of low alloy steel	39
4.3	Environments	42
4.4	High temperature corrosion	43
4.5	Summary	45
<b>5</b>	<b>Forms of Corrosion</b>	<b>47</b>
5.1	Uniform corrosion	47
5.2	Aqueous corrosion	49
5.3	Atmospheric corrosion	49
5.4	Galvanic corrosion	51
5.5	Dealloying and graphitization	53
5.6	Stray current corrosion	53
5.7	Pitting corrosion	54
5.8	Crevice corrosion	55
5.9	Filiform corrosion	56
5.10	Effects of metallurgical variables on aqueous corrosion	57
5.11	Effects of metallurgical variables on the corrosion of stainless steels, aluminum alloys and dealloying corrosion	57
5.12	Erosion corrosion, impingement attack and cavitation damage	58
5.13	Stress corrosion cracking, stress corrosion	59
5.14	Intergranular stress corrosion cracking, weld decay and knife-line attack	61
5.15	Hydrogen damage, hydrogen embrittlement	62
5.16	Selective leaching	63
5.17	Liquid metal induced embrittlement	64
5.18	Solid metal induced embrittlement	65
5.19	Sulfide stress cracking	66
5.20	Exfoliation	67
5.21	Caustic embrittlement	67
5.22	Corrosion fatigue	67
5.23	Fretting	68
5.24	Microbiologically influenced corrosion in metals	69
5.25	Summary	69
<b>6</b>	<b>Corrosion under Specific Environmental Conditions</b>	<b>71</b>
6.1	Corrosion in atmospheres	71
6.2	Corrosion in portable water, natural waters, and sea water systems	73
6.3	Corrosion in soils	75
6.4	Corrosion of reinforcement and concrete	76
6.5	Summary	78

*Technology Training that Works*

<b>7</b>	<b>Design and Material Selection for Corrosion Prevention</b>	<b>79</b>
7.1	Introduction to methods of corrosion protection	79
7.2	Corrosion resistance properties of stainless steels	79
7.3	Corrosion resistance properties of cast iron	81
7.4	Corrosion resistance properties of carbon steel and low alloy steels	83
7.5	Nickel and nickel alloys	83
7.6	Aluminum and aluminum alloys	83
7.7	Magnesium and magnesium alloys	84
7.8	Copper and copper alloys	84
7.9	Titanium and titanium alloys	85
7.10	Zinc and zinc alloys	85
7.11	Tin and tin alloys	86
7.12	Corrosion resistance of non-metallic materials	86
7.13	Summary	88
<b>8</b>	<b>Corrosion Protection Methods</b>	<b>89</b>
8.1	Surface treatment and conversion coatings	89
8.2	Ceramic, glass, and oxide coatings	91
8.3	Metal coatings	92
8.4	Coatings and linings	93
8.5	Electrochemical corrosion control methods	95
8.6	Corrosion inhibitors	96
8.7	Summary	98
<b>9</b>	<b>Corrosion Testing and Monitoring</b>	<b>99</b>
9.1	Basics of corrosion monitoring	99
9.2	Corrosion testing and monitoring techniques	103
9.3	NDT for off-line monitoring	108
9.4	Summary	113
<b>10</b>	<b>Corrosion Management – Offshore Processing</b>	<b>115</b>
10.1	Introduction	115
10.2	Framework for corrosion management	117
10.3	Planning and implementation	121
10.4	Summary	128
<b>11</b>	<b>Corrosion in Petroleum Refining and Petrochemical Operations</b>	<b>129</b>
11.1	Refinery operations and interactions with corrosion	129
11.2	Refinery units/processes — crude distillation/desalting	130
11.3	Fluid catalytic cracking unit	131
11.4	Hydro processing unit	131
11.5	Catalytic reforming	131
11.6	Decoking Units	132
11.7	Low- and high-temperature corrosion	132

*Technology Training that Works*

11.8	SCC and embrittlement	132
11.9	Erosion-corrosion	132
11.10	Materials of construction for refinery applications	132
11.11	Control of refinery corrosion	133
11.12	Failure analysis — techniques and test methods	133
11.13	Corrosion monitoring methods in refineries	133
11.14	Summary	134
<hr/>		
<b>12</b>	<b>Preventing Corrosion in Petroleum Oil and Gas Operations</b>	<b>135</b>
<hr/>		
12.1	Corrosion	135
12.2	Prevention	140
12.3	Summary	145
<hr/>		
<b>13</b>	<b>Internal Corrosion of Petrochemical Pipelines</b>	<b>147</b>
<hr/>		
13.1	Internal Corrosion in Sweet and Sour Gas Gathering	147
13.2	Corrosion Mechanisms and Mitigation	147
13.3	Recommended practices	153
13.4	Corrosion mitigation techniques	153
13.5	Corrosion inspection techniques	155
13.6	Leak detection techniques	156
13.7	Repair and rehabilitation techniques	157
13.8	Pipeline integrity management systems	159
13.9	Pipeline coatings and cathodic protection	160
13.10	Corrosion issues related to specific piping materials (steel, ductile iron, and pre-stressed concrete cylinder pipe) used in the water and wastewater industries	160
13.11	Summary	161
<hr/>		
<b>14</b>	<b>Corrosion Specific to Chemical and Pharmaceutical Industries</b>	<b>163</b>
<hr/>		
14.1	Corrosive effects of process and environment variables	163
14.2	Cleaning process equipment	164
14.3	Corrosion under thermal insulation	164
14.4	Corrosion by sulfuric acid	165
14.5	Nitric acid and nitrates	166
14.6	Organic acids	166
14.7	Chlorine, hydrogen chloride and hydrochloric acid	167
14.8	Hydrogen fluorides and hydrofluoric acid	168
14.9	Alkalis, hypochlorite, and ammonia	168
14.10	Corrosion failure of pressure vessels	169
14.11	Summary	169
<hr/>		
<b>15</b>	<b>Brief Discussion on Corrosion for Different Industries</b>	<b>171</b>
<hr/>		
15.1	Marine corrosion	171
15.2	Food industry	175
15.3	Pulp and paper industry	176

*Technology Training that Works*

15.4	Aerospace industry	177
15.5	Mining industry	178
15.6	Electronics industry	180
15.7	Summary	182
<hr/> Bibliography		183
<hr/> Appendix A Multiple Choice Questions		185
<hr/> Appendix B Corrosion Questions		199
<hr/> Appendix C Answers to Questions		203
<hr/> Appendix D Corrosion Practical Experiments		213
