# Measurement and Control for Non-Instrument Personnel

---

## Contents

<b>1</b>	<b>Introduction to Control Loop Tuning</b>	<b>1</b>
1.1	Introduction	1
1.2	Process dynamics	3
1.3	Process time constants	7
1.4	Basic definitions and terms used in process control	10
1.5	Types or modes of operation of available control systems	10
1.6	Closed loop controller and process gain calculations	12
1.7	Proportional, integral and derivative control modes	13
1.8	An introduction to cascade control	14
<b>2</b>	<b>Fundamentals of Control Systems</b>	<b>15</b>
2.1	Introduction	15
2.2	The terminology in control	16
2.3	Basic concepts of control	17
2.4	Classification control	19
2.5	Modes of feedback control	27
2.6	Reverse or direct acting controllers	44
2.7	Stability of feedback control	46
2.8	Open loop characterization of the process	49
2.9	Dead zone	54
2.10	The industrial process in practice	54
<b>3</b>	<b>Introduction to Instrumentation for Automation and Process Control</b>	<b>57</b>
3.1	Basic measurement and control concepts	57
3.2	Basic measurement performance terms and specifications	58
3.3	Advanced measurement performance terms and specifications	59
3.4	Definition of terminology	62
3.5	Process and Instrumentation Diagram symbols	64
3.6	Effects of selection criteria	68
3.7	Measuring instruments and control valves as part of the overall control system	78
3.8	Typical applications	79

*Technology Training that Works*

<b>4</b>	<b>Pressure Measurement</b>	<b>81</b>
4.1	Principles of pressure management	81
4.2	Pressure sources	82
4.3	Pressure transducers and elements - mechanical	84
4.4	Pressure transducers and elements - electrical	94
4.5	Installation considerations	100
4.6	Impact on the overall control loop	103
4.7	Selection tables	104
4.8	Future technologies	106
<b>5</b>	<b>Level Measurement</b>	<b>107</b>
5.1	Principles of level management	107
5.2	Simple sight glasses and gauging tools	108
5.3	Buoyancy tape	110
5.4	Hydrostatic pressure	112
5.5	Ultrasonic measurement	121
5.6	Radar measurement	126
5.7	Vibration switches	127
5.8	Radiation measurement	128
5.9	Electrical measurement	134
5.10	Density measurement	145
5.11	Installation considerations	147
5.12	Impact on the overall control loop	147
5.13	Selection tables	149
5.14	Future technologies	151
<b>6</b>	<b>Temperature Measurement</b>	<b>153</b>
6.1	Principles of temperature management	153
6.2	Thermocouples	154
6.3	Resistance temperature detectors	166
6.4	Thermistors	173
6.5	Liquid-in-glass, filled, bi-metallic	177
6.6	Non-contact pyrometers	185
6.7	Humidity	188
6.8	Installation considerations	190
6.9	Impact on the overall control loop	191
6.10	Selection tables	192
6.11	Future technologies	194
<b>7</b>	<b>Flow Measurement</b>	<b>197</b>
7.1	Principles of flow management	197
7.2	Differential pressure flow meters	202
7.3	Open channel flow measurement	216
7.4	Variable area flow meters	221
7.5	Oscillatory flow measurement	223
7.6	Magnetic flow meters	235
7.7	Positive displacement	241

*Technology Training that Works*

7.8	Ultrasonic flow measurement	245
7.9	Mass flow meters	248
7.10	Installation considerations	254
7.11	Impact on the overall control loop	255
7.12	Selection tables	257
7.13	Future technologies	258
<b>8</b>	<b>Control Valves</b>	<b>261</b>
8.1	Principles of control valves	261
8.2	Sliding stem valves	262
8.3	Guiding	270
8.4	Rotary valves	272
8.5	Control valve selection and sizing	276
8.6	Control valve characteristics/trim	279
8.7	Control valve noise and cavitation	285
8.8	Actuator and positioners operation	286
8.9	Valve benchset and stroking	289
8.10	Impact on the overall control loop	290
8.11	Selection tables	291
8.12	Future technologies	291
<b>9</b>	<b>Process Diagrams</b>	<b>293</b>
9.1	Introduction	293
<b>10</b>	<b>SCADA Systems Hardware and Firmware</b>	<b>313</b>
10.1	Introduction	313
10.2	Comparison of the terms of SCADA, DCS, PLC and Smart Instrument	314
10.3	Consideration and benefits of a SCADA system	320
10.4	Remote terminal units	320
10.5	Digital output module	328
10.6	PLCs used as RTUs	335
10.7	Systems reliability and availability	338
<b>11</b>	<b>SCADA Systems Software and Protocols</b>	<b>341</b>
11.1	Introduction	341
11.2	The components of a SCADA system	341
11.3	The DCS and SCADA software package	344
11.4	New technologies in SCADA	349
11.5	The twelve golden rules	350
11.6	OPC	351
<b>12</b>	<b>Typical Distributed Control Systems and SCADA Systems</b>	<b>357</b>
12.1	Introduction	357
12.2	Honeywell Plant Scape system	357
12.3	Foxboro I/A series distributed control system	369
12.4	Delta V system	375

*Technology Training that Works*

12.5	Citect	377
12.6	WonderWare	385
12.7	Intellution iFIX v2.5 system	392
12.8	Comparison of vendors	392
<hr/>		
Appendix A	Practical Sessions in Loop Tuning	393
<hr/>		
Appendix B	Practical Sessions in Control Valve Sizing	419
<hr/>		
Appendix C	CITECT Practical Session	429
<hr/>
