# Power Cables: Operation, Maintenance, Location and Fault Detection

---

## Contents

---

<b>1</b>	<b>Cables and Accessories- An Introduction</b>	<b>1</b>
1.1	Introduction	1
1.2	Low and High Voltage Cables	3
1.3	Advantages over overhead transmission lines	4
1.4	Disadvantages of cables in power transmission	5
1.5	Various types of cables	6
1.6	Cable jointing (splicing) accessories	6
1.7	Need for termination kits	7
1.8	Installation of Cables	9
1.9	Summary	9
<b>2</b>	<b>Construction of cables</b>	<b>11</b>
2.1	Introduction	11
2.2	Basic Constructional aspects	12
2.3	Insulation	16
2.4	Application Areas	29
2.5	Cable Standards	31
2.6	Summary	32
<b>3</b>	<b>Selection and Installation of Cables</b>	<b>33</b>
3.1	Introduction	33
3.2	Selection Criteria	34
3.3	Sizing	38
3.4	Installation	44
3.5	Special Locations	51
3.6	Fire Prevention and Fire Protection for Cable Installations	51
3.7	Summary	56

*Technology Training that Works*

---

<b>4</b>	<b>Joints and terminations–theory</b>	<b>57</b>
4.1	Importance of Joints and Terminations in a power cable installation	58
4.2	Basic Approach	58
4.3	Classification of Joints and Terminations	59
4.4	Pre-molded (slip on) Joints	62
4.5	Slip on Termination	65
4.6	Cold Shrink Terminations	67
4.7	Insulating Tape Joint	69
4.8	Heat Shrinkable Joints	71
4.9	Extrusion Molded Jointed for EHV cables	72
4.10	Additional Requirement for Outdoor Terminations	73
4.11	Reconstitution of Cable Properties	74
4.12	Connectivity for Cable Screen and Armor	76
4.13	Mechanical Protection of Joint and Terminations	77
4.14	Special Joints	77
4.15	Stress gradients in cable joints and terminations	83
4.16	areas requiring stress control	83
4.17	Basics of Stress control approach	85
4.18	Summary	88
<b>5</b>	<b>Practical aspects of cable jointing and termination</b>	<b>89</b>
5.1	Kits for joints and terminations	89
5.2	Shelf Life	94
5.3	Issues with prefabricated kits	95
5.4	Preparation of cable for termination and jointing	95
5.5	Connection and Reconstitution of cable properties	103
5.6	Continuity and grounding aspects	107
5.7	Sealing, Healthiness of joint/termination & Repairs	108
5.8	Installation aspects for cables and joints	111
6.9	Safety issues and access for repairs	111
5.10	Termination to Electrical Machines	117

*Technology Training that Works*

5.11	Termination of outdoor HV installation	118
5.12	Terminations to GIS Installation	120
5.13	Importance of Correct orientation of terminations	122
5.14	Installation aspects for cable joints and terminations	123
5.15	Safety issues and access for repairs	124
5.16	Summary	127

---

## **6 Cable Standards and Testing 129**

---

6.1	Review of Codes for Testing Requirements	129
6.2	Drum Length Checks	133
6.3	Post Installation Checking	134
6.4	Pre Commissioning and Periodic Tests	135
6.5	Test as Tools for Condition Monitoring and Early Failure Alarm	136
6.6	DC High Potential Test	137
6.7	Very Low Frequency AC HV Tests	138
6.8	Partial Discharge tests and Mapping of results	139
6.9	Dielectric Dissipation Factor Measurements	143
6.10	Micro Destructive and Non- Destructive Tests for Life Assessment	147
6.11	Tips on operation and Maintenance of Cables for longer life	147
6.12	Summary	148

---

## **7 Cable termination to equipment 149**

---

7.1	Types of Failures	149
7.2	Reasons for Failures	150
7.3	Fault Location	157
7.4	Electrical Tests for detection of Cable Faults	158
7.5	Safety Issues in Fault Location	162
7.6	Analysis of Failures	164
7.7	Documentation of Work	168
7.8	Documentation of Failures	169
7.9	Summary	170

*Technology Training that Works*

<b>8</b>	<b>New Trends</b>	<b>171</b>
8.1	Increasing use of underground Cables	171
8.2	New Technologies for Very High Capacities and Voltages	174
8.3	EHV XLPE Cable Systems	177
8.4	High Temperature Superconductivity in cables	178
8.5	Summary	185
	<b>Practical Exercises</b>	<b>178</b>
	<b>Practical Study</b>	<b>193</b>
	Manufacturers' information	
	<b>Appendices</b>	<b>195</b>
	Technical Paper	195
	Power Cable Pulling	203
