

Table of Contents

1	Introduction to radio frequency identification	1
1.1	Radio frequency identification - an overview	1
1.2	Evolution of RFID	2
1.3	RFID initiatives/applications	3
2	Radio frequency identification-fundamentals	21
2.1	Limitations of barcodes	21
2.2	Basic components of the radio frequency identification system	23
2.3	RFID tags	24
2.4	The electronic product code (EPC)	29
2.5	Tag packaging formats	31
2.6	Tag collisions	38
2.7	Polarization	40
2.8	Main regulatory bodies in different regions/countries	40
2.9	Communication basics	41
2.10	Piecing the components together	46
2.11	Security issues	52
3	Managing and implementing RFID business solutions	53
3.1	Introduction	53
3.2	RFID challenges	54
3.3	Planning RFID implementation	60
3.4	ROI analysis	62
3.5	Case study - RFID in supply chain management	64
3.6	Recommended best practices	71
3.7	Concluding thoughts	72

4	Hands-on exercise and discussions	75
Appendix A	Electromagnetic radiation-propagation	85
Appendix B	About EPCglobal™ & EPC	89
Appendix C	RFID manufacturers product directory	95
Appendix D	Near and far field electromagnetic propagation	117
Appendix E	Multiple tag handling and collisions - various approaches	123
Appendix F	Modulation techniques	127
Appendix G	Security and privacy issues	135
Appendix H	Glossary of important terms	141
Appendix I	Abbreviations for commonly used terms	163
