# Practical SCADA & Telemetry Systems for Industry

---

## Contents

<b>1</b>	<b>Background to SCADA</b>	<b>1</b>
1.1	Introduction and brief history of SCADA	1
1.2	Fundamental principles of modern SCADA systems	2
1.3	SCADA hardware	4
1.4	SCADA software	5
1.5	Landlines for SCADA	6
1.6	SCADA and local area networks	7
1.7	Modem use in SCADA systems	7
1.8	Computer sites and troubleshooting	8
1.9	System implementation	9
<b>2</b>	<b>SCADA systems, hardware and firmware</b>	<b>11</b>
2.1	Introduction	11
2.2	Comparison of the terms SCADA, DCS, PLC and smart instrument	11
2.3	Remote terminal units	17
2.4	Application programs	35
2.5	PLCs used as RTUs	35
2.6	The master station	43
2.7	System reliability and availability	50
2.8	Communication architectures and philosophies	52
2.9	Typical considerations in configuration of a master station	60
<b>3</b>	<b>SCADA systems software</b>	<b>63</b>
3.1	Introduction	63
3.2	The components of a SCADA system	63
3.3	The SCADA software package	66
3.4	Specialized SCADA protocols	71
3.5	Error detection	81
3.6	Distributed network protocol	85
3.7	New technologies in SCADA systems	95
3.8	The twelve golden rules	96
<b>4</b>	<b>Human Machine Interfaces (HMIs)</b>	<b>97</b>
4.1	Objectives	97
4.2	Introduction	97
4.3	HMI related ergonomic factors	97

*Technology Training that Works*

4.4	HMI configuration	98
4.5	HMI design & layout	99
4.6	HMI alarm & reporting	105
<b>5</b>	<b>Landline Media</b>	<b>109</b>
5.1	Introduction	109
5.2	Background to cables	109
5.3	Definition of interference and noise on cables	110
5.4	Sources of interference and noise on cables	111
5.5	Practical methods of reducing noise and interference on cables	117
5.6	Types of cables	122
5.7	Privately owned cables	132
5.8	Public network provided services	136
5.9	Switched telephone lines	137
5.10	Analog tie lines	139
5.11	Analog data services	142
5.12	Digital data services	146
5.13	Packet switched services	147
5.14	ISDN	150
5.15	ATM	153
<b>6</b>	<b>WAN Transport Technologies</b>	<b>155</b>
6.1	Digital transmission hierarchies	155
6.2	Plesiochronous Digital Hierarchy (PDH)	156
6.3	Integrated Services Digital Network (ISDN-BRI)	157
6.4	Integrated Services Data Network (ISDN-PRI)	164
6.5	Broadband ISDN (B-ISDN)	166
6.6	Frame Relay	167
6.7	Synchronous Digital Hierarchy (SDH/SONET)	171
6.8	Bandwidth Optimization of WAN Technologies	175
6.9	Fixed SONET/SDH Payloads	175
6.10	Inefficiencies of Fixed Payloads and Contiguous Concatenations	177
6.11	Virtual Concatenation (VCAT)	178
6.12	Link Capacity Adjustment Scheme (LCAS)	179
<b>7</b>	<b>Central site computer facilities</b>	<b>181</b>
7.1	Introduction	181
7.2	Recommended installation practice	181
7.3	Ergonomic requirements	184
7.4	Design of the computer displays	186
7.5	Alarming and reporting philosophies	190
<b>8</b>	<b>Troubleshooting and maintenance</b>	<b>193</b>
8.1	Introduction	193
8.2	Troubleshooting the telemetry system	195

*Technology Training that Works*

8.3	Maintenance tasks	198
8.4	The maintenance unit system	199
<b>9</b>	<b>Specification of systems</b>	<b>201</b>
9.1	Introduction	201
9.2	Common pitfalls	201
9.3	Standards	202
9.4	Performance criteria	202
9.5	Testing	202
9.6	Documentation	203
9.7	Future trends in technology	203
<b>Appendix A</b> Glossary		<b>207</b>
<b>Appendix B</b> Interface standards		<b>233</b>
<b>Appendix C</b> CITECT practical		<b>237</b>
