

Technology Training that Works

Installation, Testing and Troubleshooting of Transformers

Contents

1	Introduction	1
	1 Introduction	1
2	Kinds of tests	3
	2.1 Routine test	4
	2.2 Type test	4
	2.3 Special test	5
3	General requirements of tests	5
	3 General requirements of tests	5
4	Transformer tests	7
	4.1 Measurement of winding resistance	7
	4.2 Measurement of voltage ratio and check of voltage vector relationship	7
	4.3 Measurement of impedance voltage/short-circuit impedance (principal tapping) & load loss	9
	4.4 Measurement of no load loss and current	9
	4.5 Measurement of insulation resistance	10
	4.6 Dielectric tests	10
	4.7 Temperature rise	12
	4.8 Test on on-load tap changers	13
	4.9 Short-circuit test	14
	4.10 Measurement of acoustic noise level	14
	4.11 Measurement of harmonics of the no load current (NLC)	15
	4.12 Measurement of power taken by fans/oil-pumps	15
	4.13 Magnetizing current test	15
	4.14 Magnetic balance test	15
5	Insulating oil	17
	5.1 Characteristics of insulating oil	17
	5.2 Causes of deterioration of insulating oil	18
	5.3 Testing of insulating oil	19
	5.4 Inhibitors – an introduction	22
6	Introduction to dissolved gas analysis	23
7	Table of tolerances	25
