

Technology Training that Works

Transportation Planning and Management

Contents

1	Transportation Engineering – An Introduction	1
1.1	Introduction	1
1.2	Modes of Transportation	2
1.2.1	Transportation System	3
1.2.2	Transportation Demand	4
1.3	Transportation Planning	4
1.3.1	Citizen Participations	6
1.3.2	Traffic Problems in Cities	6
1.3.3	Traffic Problems in non-urban areas	6
1.4	Course objectives	7
1.5	Course outcomes	7
2	Transportation Planning	9
2.1	Introduction	9
2.2	Survey and Analysis of existing conditions	11
2.3	Classification of Roads	12
2.3.1	The functional classifications within urban areas	13
2.3.2	The functional classifications within rural areas	13
2.4	Road Patterns	16
2.5	Traffic Terminology	18
2.5.1	Passenger Car Unit (PCU)	19
2.5.2	Capacity of the roadway section	20
2.5.3	Flow rate	20
2.5.4	Design Conditions	20
2.5.5	Design Vehicle Selection	20
2.5.6	Density	21
2.5.7	Free-flow speed	21
2.5.8	Level of Service	21

Technology Training that Works

2.6	Level of Service of a Roadway	21
2.6.3	Level of Service Criteria	21
2.6.2	Factors affecting LOS of a roadway	22
2.6.3	Traffic Flow Parameters	23
2.7	Traffic Flow Parameters	23
2.8	Intersection Design	25
2.8.1	Types of Intersections	25
2.8.2	Delay	31
2.8.3	Conflict points at intersections	32
2.8.4	Intersection design considerations	25
2.9	Traffic Controls	34
2.9.1	No control	34
2.9.2	Yield Control	34
2.9.3	STOP Control	35
2.9.4	Intersection Channelization	36
2.9.5	Traffic signals	37
2.9.6	Roundabouts	40
2.10	Level of Service of Intersections	43
2.11	Design Considerations for an intersection design	46
2.12	Grade Separated Intersections	48
2.12.1	Diamond Interchange	49
2.12.2	Cloverleaf Interchange	50
2.13	Summary	52

3	Geometric Design	53
----------	-------------------------	-----------

3.1.	Introduction	53
3.2.	Right of Way	54
3.2.1.	Formation (Carriageway) width	54
3.2.2.	Median	55
3.2.3.	Slide Slopes or Curbs	55
3.2.4.	Curves	56
3.2.5.	Provision for future widening	56
3.2.6.	Shoulders	56
3.2.7.	Camber	57
3.2.8.	Gradient	58
3.3.	Horizontal Alignment	59
3.3.1.	Super-elevation	60
3.3.2.	Widening of Pavement on Horizontal Curves	64
3.3.3.	Transverse Curve	66
3.4.	Vertical Alignment	70

Technology Training that Works

3.5	Combination of Horizontal and Vertical Alignment	72
3.6.	Sight Distance	73
3.6.1.	Braking Distance/ Stopping Sight Distance	75
3.6.2.	Overtaking Sight Distance	78
3.7.	Summary	80

4 Traffic Controls 81

4.1	Introduction	81
4.2	Traffic Laws and Regulations	82
4.3	Traffic Control Signs	82
4.4	Pavement Markings	85
4.5	Street Furniture	89
4.6	Traffic Control in School zones	90
4.7	Traffic Impact Studies	91
4.7.1	TIS warrants	92
4.7.2	Analysis Scenarios	94
4.7.3	Traffic Counts	95
4.7.4	TIS Methodology	97
4.7.4	TIS Methodology	98
4.7.5	Trip Generation	98
4.7.6	Model Split	100
4.7.7	Trip Distribution	101
4.7.8	Traffic assignment	102
4.7.9	Traffic Impacts	103
4.7.10	Traffic Forecasts	104
4.7.11	Additional Analysis	106
4.8	Summary	107

5 Transportation Safety 109

5.1	Introduction	109
5.2	Accident Data	110
5.3	Types of Collisions	111
5.3.1	Head On accidents	111
5.3.2	Rear-end Collision	112
5.5.3	Overturn accident	113
5.3.4	Hit Object accidents (Broadside)	114
5.3.5	Pedestrian Hit accidents	114
5.3.6	Skidding	115
5.3.7	Right angled accident	116

Technology Training that Works

5.4	Accident Cost	117
5.5	Causes behind road accidents	118
5.6	External Factors affecting safety	121
5.7	Accident Prevention	123
5.7.1	Traffic Management Measures & their Influence in Accident Prevention	123
5.7.2	Intersection Sight Distance	124
5.7.3	Design of No Passing Zones	124
5.7.4	Sight Corners	125
5.7.5	Measures to increase Pedestrian Safety	126
5.7.6	Education and people awareness	127
5.8	Traffic Safety Systems	127
5.8.1	Clear zone concept	128
5.8.2	Guardrail	128
5.8.3	Median barrier	129
5.8.4	Glare Screens	130
5.8.5	Crash cushions	130
5.8.6	Movable Concrete Barrier	130
5.9	Street Lighting	131
5.9.1	Light Arrangements	132
5.9.2	Lighting Devices	133
5.10	Summary	135

6	Transportation Management	137
----------	----------------------------------	------------

6.1	Introduction	137
6.2	Restrictions on turning movements	138
6.3	One way streets	139
6.4	Tidal Flow (Reversible lane) Operations	142
6.5	Closing side streets	143
6.6	Exclusive Bus lanes	144
6.7	HOV lanes	145
6.8	Traffic Calming	146
6.9	Traffic Demand Management	152
6.10	Incident Management	155
6.11	Control of Traffic through Work Zones	156
6.12	Summary	159

Technology Training that Works

7	Parking	161
7.1.	Introduction	161
7.2.	Effects of parking	162
7.3.	Parking demand	162
7.3.	Parking demand	163
7.5.	Parking Level of Service	172
7.6.	Peripheral Parking Schemes	175
7.7.	Parking Studies	177
7.8.	Parking Management	179
7.9.	Two- wheelers parking	181
7.10	Summary	184
8	Transportation Economics	185
8.1	Introduction	185
8.2	Cost	186
8.3	Benefits	187
8.4	Economic analysis of a project	188
8.5	Road User Cost	191
	8.5.1 Vehicle Operating Cost	191
	8.5.2 Travel time cost	191
	8.5.3 Accident Cost	192
8.6	Collection of revenue	192
8.7	Privatization	194
	8.7.1 Public Investments	195
	8.7.2 BOT system	195
8.8	Investments in Transit service	196
8.9	Summary	197
9	Mass Transportation Systems	199
9.1	Introduction	199
9.2	Responsibility of the Mass Transportation System	200
	9.2.1 Passenger Capacity	200
	9.2.2 Speed	200
	9.2.3 Accessibility	201
	9.2.4 Energy and Air Pollution	201
	9.2.5 Safety	201
	9.2.6 Cost	202

Technology Training that Works

9.3	Comparison	202
9.3.1	Advantages of Transit systems over personal automobiles	202
9.3.2	Disadvantages of Transit systems over personal automobiles	203
9.4	Common Mass Transportation Systems	203
9.4.1	Metro Trains	203
9.4.2	Cable Railway	204
9.4.3	Electric Trolleybus	204
9.4.4	Monorail	205
9.4.5	Light Rail	206
9.4.6	Bus Systems	206
9.4.7	Guided Busways	207
9.4.8	Aerial Tramway or Ropeway	207
9.4.9	Water Transportation	208
9.5	Paratransit	209
9.5.1	Dial a ride	209
9.5.2	Jitney	209
9.5.3	Ride Shearing	209
9.6	Advantages of Transit systems	210
9.6.1	Advantages of rail	210
9.6.2	Advantages of Bus	210
9.7	Transit Stations	210
9.8	Summary	211

10	Modern Techniques and use of computer in Transportation Planning and Management	213
-----------	--	------------

10.1	Introduction	213
10.2	Use of software in the transportation Industry	214
10.2.1	Traffic Analysis Software	215
10.2.2	Computerized Traffic Modeling	218
10.3	Intelligent Transportation Systems	221
10.4	Summary	223
