

Technology Training that Works

Train the Trainer - Presentation and Instructing Skills for Engineers and Technical Professionals

Contents

Preface	xix
<hr/>	
Chapter 1— Introduction to technical training	1
1.1 What is technical training?	1
1.2 Principles of technical training	1
1.3 What is a technical presentation?	2
1.4 Background to speaking in public	3
1.5 What are the differences/similarities between public speaking, presentations and training?	3
1.6 Maximizing technical training techniques	4
1.7 Organize and present in-house technical training	7
1.8 Train to refresh	8
1.9 Teaching new technical techniques and skills	8
1.10 Empathetic training (think like your trainees)	11
1.11 Roles and responsibilities in the technical training cycle	14
1.12 Experiential and active technical training techniques	16
1.13 Technical training challenges/problems and solutions	17
1.14 Defining realistic technical training objectives	17
1.15 Managing expectations	18
<hr/>	
Chapter 2— Elements of training	19
2.1 Communication	19
2.2 Verbal communication	21
2.3 Objectives of speech—inform, entertain, convince/ persuade, instruct/teach	22
2.4 Dramatic orators are seldom-good communicators	23
2.5 Communication barriers	23
2.6 Conversational tone	27
2.7 Listening	30
2.8 Learning techniques	33

Technology Training that Works

2.9	Listen, understand, be understood, agree, and act	40
2.10	Questioning technique to test understanding—open, closed, probing, hypothetical, and clarifying	40
2.11	Responding to trainees' needs for clarification or feedback	43
2.12	Handling learner disruptions discreetly	43
2.13	Patience and learning	44
2.14	Constructive feedback	44
2.15	Accelerated learning	45
2.16	NLP (Neurolinguistic programming) and learning	46
2.17	Emotive learning	48
2.18	Peer learning	49
2.19	Corporate learning	49
2.20	Experience-based learning	50
2.21	Creating a technical learning environment	50
2.22	Creating opportunities for learners to learn from each other	52
2.23	How to improve retention of technical information	54
2.24	Integrate and apply what you learn	54
2.25	Setting technical learning objectives and reconciling it with learner expectations	55
2.26	Establish the instructor's credibility	56
2.27	Use emotion, language and leadership with authority	56
2.28	Use reasoning and evidence to persuade and instruct	57
2.29	Use analogies and stories of personal successes	57
2.30	Dealing with inconsistency	58
2.31	How to handle learners at differing levels of technical skill and experience	59
2.32	Patterns of learning	59
2.33	Dealing with classroom emotions	61
2.34	Request immediate feedback and respond to audience	64

Chapter 3— The trainees—audience analysis **65**

3.1	How do you get to know your audience?	65
3.2	Who is your audience?	65
3.3	What are their needs?	66
3.4	What do they know?	66
3.5	What are their skills?	67
3.6	How to evaluate your audience	68
3.7	Maslow's hierarchy of needs	69

Technology Training that Works

3.8	Assessing and addressing audience needs and requirements	70
3.9	Adapting technical content to trainee needs	71
3.10	The instructor's attitude towards the audience	72
3.11	Attitude of the audience towards the instructor as speaker	72
3.12	Attitude of the audience towards the training topic	73
3.13	Dealing with a disruptive audience	73
3.14	Trainee empowerment and ownership	73
<hr/>		
Chapter 4— Cultural diversity		77
<hr/>		
4.1	Establish demographics of the audience	77
4.2	How to bridge cultural diversity and handle issues	78
4.3	Give recognition to cultural rules	80
4.4	Acknowledge and respect cultural differences	81
4.5	Importance of ethics	82
4.6	How to treat disabled delegates	82
4.7	Presentation by a handicapped person	84
4.8	Use humor within the cultural context (do not offend)	84
4.9	Training environment	84
4.10	Controlling and adjusting temperatures	92
<hr/>		
Chapter 5— The instructor—Handling anxiety and calming nerves		97
<hr/>		
5.1	How comfortable are you in speaking?	97
5.2	Using nervousness to work for you	98
5.3	How to overcome presentation fear	101
5.4	Relaxation and breathing techniques	103
5.5	Using sound preparation to combat fear and anxiety	105
5.6	Know your introduction	107
5.7	Think before you speak	107
5.8	Practice out loud	107
5.9	Practice in front of a mirror	107
5.10	Practice in front of a select audience	108
5.11	Record your presentation electronically	108
5.12	Practice mentally	109
5.13	Focus on technical ideas and principles	109
5.14	Concentrate on the presentation and reduce self-awareness	110
5.15	Gain confidence and competence to command attention	110

Technology Training that Works

5.16 Self-hypnosis	111
5.17 Remain cool, calm and in control	111

Chapter 6— Voice	113
6.1 The image of your voice	113
6.2 Listen objectively to your own voice	113
6.3 Effective vocal articulation to create impact	114
6.4 Control and articulation	115
6.5 Sound production	115
6.6 Voice projection and voice control techniques	116
6.7 Quality of voice	117
6.8 Cultural differences affect voice	118
6.9 Accent	118
6.10 Practice pronunciations	118
6.11 Elocution exercises	119
6.12 Clarity of speech	120
6.13 Don't swallow the end of words and sentences	120
6.14 Factors that influence tone in voice	121
6.15 Caring for your voice	121
6.16 Foods for presentation	122
6.17 Use volume, pace, tone and pitch to add variety and meaning	123
6.18 Emphasize to effect emotional meaning	123
6.19 Using planned pauses	123
6.20 Vary your pace	124
6.21 Limit use of verbal fillers	124
6.22 Vary your inflection	125
6.23 If you use a microphone, do so effectively and sparingly	125
6.24 Correcting common voice problems	125
6.25 Language	126
6.26 Use good conversational English	127
6.27 Avoid ambiguous words and misunderstandings	127
6.28 Language paints vivid pictures and strong images	127
6.29 Expressing emotion with language	127
6.30 Use clear and simple language	127
6.31 Managing language differences and overcoming barriers	128
6.32 Use familiar words and ideas	128
6.33 Define unfamiliar terms	129
6.34 Translate technical jargon into non-technical terms	129
6.35 Employ appropriate language	129
6.36 Use short and simple sentences	130

Technology Training that Works

6.37	Active versus passive voice	130
6.38	Concrete versus abstract ideas	130
6.39	Humor in language	130
6.40	Avoid swear words	130
6.41	Avoid gender specific and sexual references	130
6.42	Avoid religious and political references	131
6.43	The positive effect of good vocabulary	131

Chapter 7— The secrets of successful instructors **133**

7.1	Attributes and characteristics	133
7.2	Discover your strengths as a technical instructor	138
7.3	Minimize your weaknesses	139
7.4	'Hide' errors	139
7.5	Refresh existing skills	139
7.6	Improve your training methods by learning new methods and techniques	140
7.7	Endeavor to reach your training goals and objectives	140
7.8	Know your subject	141
7.9	Focus on key learning points	141
7.10	Ensure the presentation is practical	142
7.11	Transmit your technical expertise effectively	143
7.12	Know your context	143
7.13	Know your slides	144
7.14	Maintain a sense of humor to handle difficulties in lecturing	144
7.15	Display initiative	144
7.16	Develop a positive philosophy and attitude	145
7.17	Be positive and passionate about the topic	145
7.18	Physical appearance	146
7.19	Non-verbal language	152
7.20	Company image	163
7.21	Design and supply effective and easy to use course material	164

Chapter 8—The presentation-preparation **165**

8.1	Organizing the presentation	165
8.2	Structuring and developing the training presentation	166
8.3	Body/content	167
8.4	Development of a presentation	168
8.5	Deciding on presentation methods	169
8.6	Personalizing a lesson	170

Technology Training that Works

8.7	Determining when to introduce difficult technical concepts in the workshop	171
8.8	Preparation tips	171
8.9	Prepare and rehearse practical sessions before the presentation	172
8.10	Ensure that practical concepts work	172
8.11	Be prepared for any possible eventuality	173
8.12	Ensure that you have sufficient manuals and handouts	173
8.13	Rehearse	173
8.14	Timing yourself	174
8.15	Plan to exceed expectations	175
8.16	Prepare early	175
8.17	Research and brainstorm your topics	175
8.18	Equip yourself with creative examples, words, images, stories and analogies	176
8.19	Prepare notes	177
8.20	Index cards	177
8.21	Route map	178
8.22	Prepare handouts	179
8.23	Precise technical training	179
8.24	Practice setup of electronic equipment and slide show	180
8.25	Practice troubleshooting	181
<hr/> Chapter 9— Successful training with impact		183
9.1	Structure your presentation	183
9.2	Content and format is equally important	183
9.3	Successful training is based on technical skills and communication skills	184
9.4	The right amount of information	184
9.5	Give attention to detail	184
9.6	Use variety to keep interest	184
9.7	Alternate between levels of difficulty	185
9.8	Use logic—recall ideas in correct sequence	186
9.9	Convey information effectively	186
9.10	Synchronized ideas eliminate confusion	186
9.11	Be wary of contradictions	186
9.12	Cite sources where applicable	186
9.13	Limit focus—what THEY need to know, not what YOU know	186
9.14	Build credibility—add interest, clarify a point, prove a point	187
9.15	Maintain rhythm and balance—speed of presentation	187

Technology Training that Works

9.16 Use verbal materials	187
9.17 Practical demonstrations	187
9.18 Presenting technical concepts	188
9.19 Explaining technical concepts	188
9.20 Demonstrating technical concepts	188
9.21 Use examples from your experience	189
9.22 Use analogies from their experience	189
9.23 Role-playing	189
9.24 How to inject interest into a dull presentation	191
9.25 Do not overload	191
9.26 Preview and summarize	191
9.27 Use signposts and transitions	191
9.28 Different ways to repeat information	192
9.29 Sharpen your delivery	192
9.30 The do and don'ts of effective technical presentations	192
9.31 Anticipate problems and find solutions	194
9.32 Be proactive, think forward, anticipate, avoid and deal with problems	194
9.33 Provide professional and knowledgeable presentations irrespective of venue, time or subject	195
9.34 Do not use your position as a marketing or selling platform	195
9.35 Fulfill expectations	195
9.36 The introduction	195
9.37 Spellbound introductions	196
9.38 Icebreakers	196
9.39 Perform proven opening rituals that works for you	196
9.40 Give the audience a reason to listen	196
9.41 Different ways to begin a presentation	196
9.42 Techniques to intrigue arouse and hold participants' attention	197

Technology Training that Works

9.43 Conclusion	197
9.44 Summarize main points in your conclusion	198
9.45 Evaluate the success and effectiveness of the course	198
9.46 Critique and assess your preparation and delivery of the technical training	199
9.47 Evaluation forms	200
9.48 Memorable endings	201
9.49 Humor in language	201

Chapter 10— Instructor/delegate relationship	203
---	------------

10.1 Monitor the audience	203
10.2 Involve whole audience	203
10.3 Break cycle of attention to keep attention	203
10.4 Vary intensity level—moving around, visuals, questions	204
10.5 Encourage active audience involvement	205
10.6 How to handle irrelevant but interesting interruptions and discussions	205
10.7 Motivate participants	205
10.8 How to get attendees back on time after breaks	206
10.9 Time management	206
10.10 Supporting material	207
10.11 After the workshop	208

Chapter 11— Participatory exercises	211
--	------------

11.1 Evaluate training	211
11.2 Employ participatory exercises	211
11.3 Encourage participation by using well-researched activities	212
11.4 Maintain a balance between activities, input and discussion	212
11.5 Explain to trainees what is expected of them during practical sessions and what you hope to achieve	213
11.6 Place a reasonable time limit on practical sessions	213
11.7 Do not belittle anyone in the room—making them look silly or stupid	214
11.8 Assess what participants have learnt	214
11.9 Help participants to retain and apply acquired information, techniques and skills	215

Technology Training that Works

Chapter 12— Questions and answers	217
12.1 Anticipate questions from the audience	217
12.2 When do you want questions?	218
12.3 The art of questioning—questioning technique	219
12.4 Answering questions	220
12.5 Rephrase questions from the audience	221
12.6 Draw on the knowledge of the audience—involve audience in answering the questions	222
12.7 Give satisfactory but short answers	222
12.8 Offer solutions to common problems	223
12.9 How to handle complex or difficult questions	223
12.10 How to handle problematic delegates	223
12.11 Analyze arguments and motivation—do not get involved in arguments	224
12.12 Overcoming resistance	225
12.13 Overview of questioning	225
12.14 Do and don'ts of handling questions	225
12.15 Have questions ready	226
12.16 Stimulate participation through questioning	226

Chapter 13— Myths	229
13.1 Speaking to the public is easy	229
13.2 A technical message is always clear	229
13.3 The audience will always understand a technical message	229
13.4 It is easy to teach a subject when you have the technical skills	230
13.5 Action follows automatically	230
13.6 Objectivity guarantees success	230
13.7 Pictures are always true	231
13.8 You must memorize the presentation to be successful	231
13.9 Nervousness is a sign of weakness	231
13.10 Notes must never be visible	232
13.11 Always start with a joke	232
13.12 It is not necessary to prepare if you know your subject	232
13.13 Rely on the slide presentation to carry you through	233

Technology Training that Works

Chapter 14— Integrating text, graphics, visuals and audio to structure powerful presentations	235
14.1 When to use visual support	235
14.2 Innovative ways to present technical material	235
14.3 Use visual aids effectively	236
14.4 How to systematically design and use visual aids to support your message	236
14.5 Desktop presentation software	237
14.6 Microsoft word for text charts	237
14.7 Excel for graphics	238
14.8 Clip art	242
14.9 The presentation tools	242
14.10 Using a pointer	251
14.11 Use equipment expertly	252
14.12 Cope with equipment problems	252
14.13 Perform set-up before the start of the training session	252
14.14 Projector	252
14.15 Distortion	253
14.16 Computer set-up	256
14.17 Do not block the path of the overhead screen or white board	256
14.18 Ensure that the delegates can see you	257
14.19 Ensure that the audience can hear	257
14.20 Talk directly to the audience when illustrating a concept	257
14.21 Technology must support, not divert from good communication	257
Chapter 15— Using PowerPoint to maximize impact	259
15.1 PowerPoint do and don'ts	259
15.2 Techniques and tips for designing and producing powerful slides	260
15.3 Using PowerPoint templates to produce slide shows (consistency and balance)	262
15.4 Making impromptu PowerPoint slides	263
15.5 Slide layout	264
15.6 Keep slides to the minimum	264
15.7 How many slides should an instructor prepare?	264
15.8 How many slides should be used?	265
15.9 Navigate through slides	265
15.10 Hidden slides	265

Technology Training that Works

15.11 Using animated graphics	266
15.12 Using color and pictures in your slides	266
15.13 Importing graphics	267
15.14 Changing font size	268
15.15 Backgrounds	270
15.16 PowerPoint logistics	270
15.17 Have sufficient slides on hand and tailor their use to your audience	271
15.18 Ensure that slides look professional	271
<hr/>	
Chapter 16— Preparing checklists	273
<hr/>	
16.1 Presentation checklist	276
16.2 Checklist for slide presentation	277
16.3 Performance checklist	278
16.4 Tips and hints for technical instructors	281
16.5 Tips and hints for trainees	283
16.6 Tips and hints for technical presentations	284
<hr/>	
Bibliography	287
<hr/>	
Practical exercises	
<hr/>
