

Technology Training that Works

Practical Troubleshooting of TCP/IP Networks

Contents

1	Introduction	1
1.1	Network types	1
1.2	The OSI model	2
1.3	The Client/Server paradigm	9
1.4	General troubleshooting methodology	10
2	Ethernet	13
2.1	10 Mbps CSMA/CD Ethernet	13
2.2	100 Mbps Ethernet	22
2.3	Gigabit Ethernet	23
2.4	Switching technology	24
2.5	Industrial Ethernet	27
3	TCP/IP	37
3.1	Overview	37
3.2	IPv4	39
3.3	IPv6	43
3.4	ICMP	49
3.5	ARP	51
3.6	Routing	54
3.7	TCP	59
3.8	UDP	63
4	Troubleshooting Tools	65
4.1	DOS utilities	65
4.2	Windows utilities	77
4.3	Protocol analyzers	81
5	Network Construction	85
5.1	Assignments	85
6	Basic System Checks	93
6.1	Assignments	93
7	Troubleshooting Media	97
7.1	Assignments	97

Technology Training that Works

8	Troubleshooting at Layer 2	99
8.1	Assignments	99
9	Troubleshooting at Layer 3	103
9.1	Assignments	103
10	Troubleshooting at Layer 4	109
10.1	Assignments	109
11	Troubleshooting the Internet Connection	113
11.1	Assignments	113
12	Hacking Tools	115
12.1	Assignments	115
	Appendix A – Setting up a PC as a Router	119
	Appendix B – Setting up Cisco Routers	123
	Appendix C – Hardware and Software Requirements	133
	Appendix D – Answers	135
